Quantitative Methods in Cognitive Semantics Dylan Glynn,Kerstin Fischer,2010 Review text Overall this volume is an important contribution to the development of empirical Cognitive Semantics This collection of high quality papers provides the reader with an insight into the most important empirical approaches in corpus driven semantic research Natalia Levshina in Linguist List 20 3011   Quantitative Methods in Cognitive Semantics: Corpus-Driven Approaches Dylan Glynn,Kerstin Fischer,2010-11-29 In line with the increasing use of empirical methods in Cognitive Linguistics the current volume explores the uses of quantitative in particular corpus driven techniques for the study of meaning It shows how these techniques contribute to the core theoretical issues of Cognitive Semantics as well as how they inform semantic analysis The research presented in the volume constitutes an important step towards an Empirical Cognitive Semantics   Empirical Approaches to Cognitive Linguistics Milla Luodonpää-Manni,Johanna Viimaranta,2017-05-11 This collection takes a cognitive linguistic view on analyzing language and presents innovative contemporary Finnish research to the international audience The volume brings together nine chapters presenting empirical case studies that rely on various kinds of corpus data and experimental data or combine both types of empirical evidence The topics vary from semantics to grammatical description from terminological choices to language acquisition and they study language from perspectives as diverse as psycholinguistics comparative linguistics and translation studies A multi methodological approach to linguistic research is promoted in this book The idea is that language in all its diversity can best be studied by using the entire spectrum of modern quantitative and qualitative methods It will appeal to academic readers students and established researchers interested in the study of authentic linguistic material especially from the cognitive perspective   **Ancient Texts and Modern Readers** ,2019-06-07 The chapters of this volume address a variety of topics that pertain to modern readers understanding of ancient texts as well as tools or resources that can facilitate contemporary audiences interpretation of these ancient writings and their language In this regard they cover subjects related to the fields of ancient Hebrew linguistics and Bible translation The chapters apply linguistic insights and theories to elucidate elements of ancient texts for modern readers investigate how ancient texts help modern readers to interpret features in other ancient texts and suggest ways in which translations can make the language and conceptual worlds of ancient texts more accessible to modern readers In so doing they present the results of original research identify new lines and topics of inquiry and make novel contributions to modern readers understanding of ancient texts Contributors are Alexander Andrason Barry L Bandstra Reinier de Blois L nart J de Regt Gideon R Kotz Geoffrey Khan Christian S Locatell Kristopher Lyle John A Messarra Cynthia L Miller Naud Jacobus A Naud Daniel Rodriguez Eep Talstra Jeremy Thompson Cornelius M van den Heever Herrie F van Rooy Gerrit J van Steenbergen Ernst Wendland Tamar Zewi

The Bloomsbury Companion to Cognitive Linguistics Jeannette Littlemore,John R. Taylor,2014-06-19 The Bloomsbury Companion to Cognitive Linguistics is a comprehensive and accessible reference resource to research in contemporary

cognitive linguistics Written by leading figures in the field the volume provides readers with an authoritative overview of methods and current research topics and future directions The volume covers all the most important issues concepts movements and approaches in the field It devotes space to looking specifically at the major figures and their contributions It is a complete resource for postgraduate students and researchers working within cognitive linguistics psycholinguistics and those interested more generally in language and cognition **Change of Paradigms – New Paradoxes** Jocelyne Daems,Eline Zenner,Kris Heylen,Dirk Speelman,Hubert Cuyckens,2015-10-16 In Paradigm and Paradox Dirk Geeraerts formulated many of the basic tenets that were to form what Cognitive Linguistics is today Change of Paradigms New Paradoxes links back to this seminal work exploring which of the original theories and ideas still stand strong which new questions have arisen and which ensuing new paradoxes need to be addressed It thus reveals how Cognitive Linguistics has developed and diversified over the past decades **Sensory Adjectives in the Discourse of Food** Catherine Diederich,2015-04-15 Sensory Adjectives in the Discourse of Food presents a frame based analysis of sensory descriptors This book investigates the identification and usefulness of conceptual frames in three respects First an analysis of scientific language use shows that a semantic interpretation of the adjectives is dependent on the operationalizations performed in the field of sensory science Second a systematic frame semantic analysis of the descriptors sheds light on how meaning is constructed with regard to the lexemes wider context from the utterance to the text type Third a comparison with German descriptors tests the applicability of a frame from one language to another English German Framing presents itself as a means to capture the knowledge representation that underlies a particular discourse With its detailed linguistic analyses and its interdisciplinary treatment of framing across discourse specialized vs public discourse this book is interesting for researchers working within cognitive linguistics terminology and sensory science **The Neo-Aramaic Dialect of the Jews of Dohok** Dorota Molin,2024-04-22 This book combines in depth grammatical analysis with dialectology and typology It presents important features of Jewish Neo Aramaic from Dohok Iraqi Kurdistan a previously undocumented dialect that is now on the verge of extinction The first Neo Aramaic grammar to offer data glossing this book is accessible for and highly relevant to Semitists language typologists and historical linguists It focuses especially on phonology verbal morphosyntax and syntax The monograph also highlights features that characterise the wider li ana deni dialect group which is the most widespread Jewish Neo Aramaic today The book leverages the staggering microvariation persisting within North Eastern Neo Aramaic to reconstruct the grammaticalisation of some key Neo Aramaic constructions It also includes a text sample of prime historiographic value Jews of Iraq during the Second World War *The Exercise of Power in Communication* R. Schulze,H. Pishwa,2015-05-05 This book explores the various choices speakers or communicators make when expressing power relations in modern societies The volume brings together several disciplines such as linguistics sociology communication studies and social psychology to give insight into how interactants co construct different aspects of power in their everyday life **Corpora and the**

Changing Society Paula Rautionaho,Arja Nurmi,Juhani Klemola,2020-04-15 This book showcases eleven studies dealing with corpora and the changing society The theme of the volume reflects the fact that changes in society lead to changes in language and vice versa Focusing on the English language be it from Old English to the present or a shorter time span in the immediate past the contributors in this volume use a variety of corpus methods to address the two patterns of change The cross fertilization of cultural studies and corpus linguistics we hope is beneficial for both parties as corpus linguistics offers a vast array of materials and methods to investigate cultural and societal change while cultural studies provide the theoretical background on which to build our research The studies included in the present volume illustrate the potential avenues and the merits of combining changing language and changing societies   **Extending the Scope of Construction Grammar** Ronny Boogaart,Timothy Colleman,Gijsbert Rutten,2014-09-12 The field of constructionist linguistics is rapidly expanding as research on a broad variety of language phenomena is increasingly informed by constructionist ideas about grammar This volume is comprised of 11 original research articles representing several emerging new research directions in construction grammar which together offer a rich picture of the various directions in which the field seems to be moving

    Constructions across Grammars Martin Hilpert,Jan-Ola Östman,2016-03-22 Up to now most research in Construction Grammar has focused on single languages most notably English This volume aims to broaden the scope of Construction Grammar towards issues in bi and multilingualism second language learning and generalizations across different languages and language varieties The contributions in this volume show that speakers entertain generalizations across their repertoire of languages which holds important implications for a multilingual Construction Grammar Originally published in Constructions and Frames 6 2 2014   **The Making and Breaking of Classification Models in Linguistics** Jane Klavan,2024-06-04 The book provides a methodological blueprint for the study of constructional alternations using corpus linguistic methods in combination with different types of experimental data The book looks at a case study from Estonian This morphologically rich language is typologically different from Indo European languages such as English Corpus based studies allow us to detect patterns in the data and determine what is typical in the language Experiments are needed to determine the upper and lower limits of human classification behaviour They give us an idea of what is possible in a language and show how human classification behaviour is susceptible to more variation than corpus based models lead us to believe Corpora and forced choice data tell us that when we produce language we prefer one construction Acceptability judgement data tell us that when we comprehend language we judge both constructions as acceptable The book makes a theoretical contribution to the what why and how of constructional alternations   *Entrenchment and the Psychology of Language Learning* Hans-Jörg Schmid,2016-12-19 In recent years linguists have increasingly turned to the cognitive sciences to broaden their investigation into the roots and development of language With the advent of cognitive linguistic usage based and complex adaptive models of language linguists today are utilizing approaches and insights from cognitive psychology neuropsychology social

psychology and other related fields A key result of this interdisciplinary approach is the concept of entrenchment the ongoing reorganization and adaptation of communicative knowledge Entrenchment posits that our linguistic knowledge is continuously refreshed and reorganized under the influence of social interactions It is part of a larger ongoing process of lifelong cognitive reorganization whose course and quality is conditioned by exposure to and use of language and by the application of cognitive abilities and processes to language This volume enlists more than two dozen experts in the fields of linguistics psycholinguistics neurology and cognitive psychology in providing a realistic picture of the psychological and linguistic foundations of language Contributors examine the psychological foundations of linguistic entrenchment processes and the role of entrenchment in first language acquisition second language learning and language attrition Critical views of entrenchment and some of its premises and implications are discussed from the perspective of dynamic complexity theory and radical embodied cognitive science **Give Constructions across Languages** Myriam Bouveret,2021-03-15 This cognitive contrastive study of ten languages Chinese Dalabon English French Spanish Romanian Kurdish Khmer Polish Tibetan focuses on the concept of giving from six main points of view namely argument structure lexical semantics and event structure role marking in the three argument construction and in other constructions lexicalization grammaticalization and constructionalization of the verb from a cognitive construction grammar point of view and central and extended meanings It is proposed that a continuum approach to grammar and lexicon is needed in order to describe the typological and historical facts The volume argues for a concrete and abstract transfer cluster model involving coverage of lexical and grammatical extension or bleaching phenomena and that the semantic extensions metaphorical and otherwise exploit various portions of this schema The volume is deeply anchored in the Cognitive Construction Grammar theoretical movement and proposes analyses of constructional phenomena to illustrate a grammar to lexicon continuum in synchrony and diachrony language change grammaticalization chains constructionalization analysis and an invariant hypothesis of giving as a basic activity in human cognition *Lexical Variation and Change* Dirk Geeraerts,Dirk Speelman,Kris Heylen,Mariana Montes,Stefano De Pascale,Karlien Franco,Michael Lang,2023-10-23 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations This book introduces a systematic framework for understanding and investigating lexical variation using a distributional semantics approach Distributional semantics embodies the idea that the context in which a word occurs reveals the meaning of that word In contemporary corpus linguistics that idea takes shape in various types of quantitative analysis of the corpus contexts in which words appear In this book the authors explore how count based token level semantic vector spaces as an advanced form of such a quantitative methodology can be applied to the study of polysemy lexical variation and lectometry What can distributional models reveal about meaning How can they be used to analyse the semantic relationship between near synonyms and to identify strict synonymy How can they contribute to the study of lexical variation as a

sociolinguistic variable and to the use of those variables to measure convergence or divergence between language varieties To answer these questions the book presents a comprehensive model of lexical and semantic variation based on the combination of a semasiological an onomasiological and a lectal dimension It explains the mechanism of distributional modelling both informally and technically and introduces workflows and corpus linguistic tools that implement a distributional perspective in lexical research Combining a cognitive linguistic interest in meaning with a sociolinguistic interest in variation the authors illustrate this distributional methodology using case studies of Dutch and Spanish lexical data that focus on the detection of polysemy the interaction of semasiological and onomasiological change and sociolinguistic issues of lexical standardization and pluricentricity Throughout they highlight both the advantages and disadvantages of a distributional methodology on the one hand it has great potential to be scaled up for lexical research on the other its outcome does not necessarily neatly correspond with what would traditionally be considered different senses **How to do Linguistics with R** Natalia Levshina,2015-11-25 This book provides a linguist with a statistical toolkit for exploration and analysis of linguistic data It employs R a free software environment for statistical computing which is increasingly popular among linguists How to do Linguistics with R Data exploration and statistical analysis is unique in its scope as it covers a wide range of classical and cutting edge statistical methods including different flavours of regression analysis and ANOVA random forests and conditional inference trees as well as specific linguistic approaches among which are Behavioural Profiles Vector Space Models and various measures of association between words and constructions The statistical topics are presented comprehensively but without too much technical detail and illustrated with linguistic case studies that answer non trivial research questions The book also demonstrates how to visualize linguistic data with the help of attractive informative graphs including the popular ggplot2 system and Google visualization tools This book has a companion website http doi org 10 1075 z 195 website Big Data in Computational Social Science and Humanities Shu-Heng Chen,2018-11-21 This edited volume focuses on big data implications for computational social science and humanities from management to usage The first part of the book covers geographic data text corpus data and social media data and exemplifies their concrete applications in a wide range of fields including anthropology economics finance geography history linguistics political science psychology public health and mass communications The second part of the book provides a panoramic view of the development of big data in the fields of computational social sciences and humanities The following questions are addressed why is there a need for novel data governance for this new type of data why is big data important for social scientists and how will it revolutionize the way social scientists conduct research With the advent of the information age and technologies such as Web 2 0 ubiquitous computing wearable devices and the Internet of Things digital society has fundamentally changed what we now know as data the very use of this data and what we now call knowledge Big data has become the standard in social sciences and has made these sciences more computational Big Data in Computational Social Science and Humanities will

appeal to graduate students and researchers working in the many subfields of the social sciences and humanities

Variation in Metonymy Weiwei Zhang,2016-04-11 The monograph presents new findings and perspectives in the study of variation in metonymy both theoretical and methodological Theoretically it sheds light on metonymy from an onomasiological perspective which helps to discover the different conceptual or lexical pathways through which a concept or a group of concepts has been designated by going back to the source concepts In addition it broadens the perspective of Cognitive Linguistics research on metonymy by looking into how metonymic conceptualization and usage may vary along various dimensions Three case studies explore significant variation in metonymy across different languages time periods genres and social lects Methodologically the monograph responds to the call in Cognitive Linguistics to adopt usage based empirical methodologies The case studies show that quantification and statistical techniques constitute essential parts of an empirical analysis based on corpus data The empirical findings demonstrate the essential need to extend research on metonymy in a variationist Cognitive Linguistics direction by studying metonymy s cultural historical and social lectal variation

Metaphor and Metonymy across Time and Cultures Javier E. Díaz-Vera,2014-12-11 This volume offers new insights into figurative language and its pervasive role as a factor of linguistic change The case studies included in this book explore some of the different ways new metaphoric and metonymic expressions emerge and spread among speech communities and how these changes can be related to the need to encode ongoing social and cultural processes in the language They cover a wide series of languages and historical stages
