1. **Identify the security type (physical)**  
 Physical security includes the physical controls, measures, and practices designed to protect the hardware or physical components of the information system.
2. **Identify the associated risks (security threat identified as part of the threat analysis)**  
 The associated risks are the potential damage to the information system that could result from the security threat.
3. **Identify the controls to protect the system (controls)**  
 Controls are the measures that are used to protect the system from the security threat.
