Growth takes the reader into the bold new world of pay per use for a product or service From the perspective of the customer
the servitization model yields multiple benefits the consumer can try out the product service at a relatively low cost the risk
is mitigated capital expenses can be converted into operating expenses it is not needed to forecast how often the product
service is used and only parts of the product service needed can be used Similarly a provider can benefit by having a larger
market coverage steadier stream of revenues upgrades as and when needed sharing of fixed assets across consumers
practicing of value based pricing and unbundling or bundling utility for consumers using appropriate pricing techniques
However this nanoization of products services is tricky and has to be designed carefully This book provides a set of recipes to
providers to adopt the XaaS model by changing the provider s mindset dividing the product service forces the provider to
take a value driven approach to his product service and consequently eliminate all non value added activities The
requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider and as
guide to understanding the customer s needs The book also covers data acquisition data analysis and synthesis and data
application needs of the XaaS model with simple examples and case studies from the business world of firms that achieve
these objectives successfully *S.T.S. Transport Service, Inc. V. Volvo White Truck Corporation* ,1984 MQR Equipment
