

Installation

- 1**
Ensure new seals are in position on the pressure differential sensor mounting flange.
- 2**
Place the pressure differential sensor in position on the venturi tube and install the mounting bolts.

- 3**
Tighten the mounting bolts to specification.
- 4**
Connect the wiring harness lead to the sensor terminal.
- 5**
Due to the Engine Electronic Control Unit (EECU) self learning capability, it is necessary to reset learned EECU parameters after servicing some engine related components. This allows the EECU to learn the new components behavior. After servicing is complete, perform the "Learned Data Reset" using the PC tool. This is located in the Function Group 1 menu.

Venturi Tube

Removal

- 1**
Apply the parking brake and place the shift lever in neutral.
 - 2**
Disconnect the wiring harness lead from the pressure differential sensor terminal.
- Note:** The pressure differential sensor can be removed from the venturi tube or left in place and removed as an assembly with the venturi tube.
