Teaching American Literature in Spanish Universities Carme Manuel Cuenca, 2002. Uno de los aspectos más valiosos de este libro es que comienza enlazando a través de los dos primeros artículos la educación universitaria con su nivel inmediatamente anterior, la escuela de secundaria, una conexión que a menudo se olvida con serios resultados para ambos. En este sentido, Benito Camacho Martín, el autor de uno de los artículos, realiza un análisis crítico y en cierto modo dogmático sobre el declive de la enseñanza de literatura en las escuelas de secundaria tanto en horas dedicadas como en conocimientos adquiridos. Los otros artículos, algunos en inglés y otros en castellano, tratan distintos aspectos de la enseñanza de literatura norteamericana con un énfasis manifiesto en materiales del siglo XX y sobre todo en la literatura afroamericana. De hecho, el libro resultará particularmente útil para los profesores de esto último.

The craft of teaching and learning is like playing in a symphony orchestra every instrument has a voice and every voice is integral to the whole The arts history anthropology and philosophy and their forged discourses offer us a series of cautionary tales about the multiplicity of ways we can see and understand our world ways we often ignore in the classroom In the case of epistemology and pedagogy in particular we have hinged our understanding on a binary of opposites engaged in a dialectic dance and a type of discourse constructed to describe and explain it The art and act of teaching in this as if world necessitates teachers to be public intellectuals intellectual symbols who represent something more than just subject knowledge expertise but serve as conduits between the discourses of our world Established genres and discourses are exclusionary The vast migration of people and ideas is producing a new set of presuppositions The manner in which we decode other discourses and fuse them into meanings both personal and shared is the root of both teaching and learning giving us a window into the way that each form of thought is connected both historically and experientially Look around you your school is becoming the United Nations but it s not so united Don t aim for truth aim for understanding Today s students construct and deconstruct in a multitude of ways on an as needed just in time basis Since ideas of difference are often nudged but unacknowledged we are in danger of becoming pedagogical dinosaurs not heeding change until it is too late Teaching and learning are construction zones so get out your hard hat These constructions are possibilities that need to be discussed and negotiated allowing us to sidestep the traps of grand narratives and a hierarchy of disciplinarity and research methodology Our possibilities need to be forged on an anvil of diversity These are the spaces the interstices where our voices become innovative and our silence offers a safe harbor Spaces to listen collaborate and craft cautionary tales about our lives and the possibilities for a shared future
