**Japrocksampler** Julian Cope, 2016-05-19 A unique account of the Japanese rock phenomenon from a legendary rock musician with an army of fans The most obscenely enjoyable book of the year enlightening thrilling and occasionally hilarious Cope is a supremely engaging writer whose aim is to entertain educate and freak out Telegraph This book's astonishing blend of seriousness and hilariousness is testament to perhaps the most remarkable mind in rock today Word Julian Cope eccentric and visionary rock musician follows the runaway underground success of his book Krautrocksampler with Japrocksampler a cult deconstruction of Japanese rock music and reveals what really happened when East met West after World War Two It explores the clash between traditional conservative Japanese values and the wild rock n roll renegades of the 1960s and 70s and tells of the seminal artists in Japanese post war culture from itinerant art house poets to violent refusenik rock groups with a penchant for plane hijacking

**Anchora of Delta Gamma**, 1903

**Love** Anthony Walsh, 2017-07-05 Love is a little word with a universe of meanings and has engaged people's interest throughout human history The need to give and receive love lies deep within human nature Philosophers poets theologians sociologists and scientists have all attempted to explain its exact origin but is it an evolutionary adaptation or a social construct Walsh discusses that the nature of and need for love has biological origins He draws upon Darwin's sexual selection theory to define the perceptions of love by infants through the process of experience dependent brain wiring He observes that mother love makes a child capable of loving and that father love makes a child feel worthy of love He appraises the origin and purpose of romantic love in his discussions on sexual reproduction by looking at chemical and neurological responses to love and the influence of love on one's physical and mental health With frequent quotes from literary masters like Shakespeare to orient one's scientific and humanistic understanding of love Walsh goes on to explore various styles of romantic love including monogamy promiscuity bartering love and betrayed love the effects of a skewed sex ratio on dating and mating practices and the age old quest for a perfect society populated by perfect people obeying the biblical command to love one another

**The Embers and the Stars** Erazim Kohák, 2015-07-10 It is hard to put this profound book into a category Despite the author's criticisms of Thoreau it is more like Walden than any other book I have read The book makes great strides toward bringing the best insights from medieval philosophy and from contemporary environmental ethics together Anyone interested in both of these areas must read this book Daniel A Dombrowski The Thomist Those who share Kohák's concern to understand nature as other than a mere resource or matter in motion will find his temporally oriented interpretation of nature instructive It is here in particular that Kohák turns moments of experience to account philosophically turning what we habitually overlook or avoid into an opportunity and basis for self knowledge This is an impassioned attempt to see the vital order of nature and the moral order of our humanity as one Ethics

*Envisioning Howard Finster* N. J. **Envisioning Howard Finster** Norman J. Girardot, 2015-06-26 The Reverend Howard Finster 1916 2001 was called the backwoods William Blake and the Andy Warhol of the South and he is considered the godfather of contemporary American folk and visionary art This

book is the first interpretive analysis of the intertwined artistic and religious significance of Finster's work within the context of the American outsider art tradition. Finster began preaching as a teenager in the South in the 1930s. But it was not until he received a revelation from God at the age of sixty that he began to make sacred art. A modern day Noah who saw his art as a religious crusade to save the world before it was too late. Finster worked around the clock often subsisting on a diet of peanut butter and instant coffee. He spent the last years of his life feverishly creating his environmental artwork called Paradise Garden and what would ultimately number almost fifty thousand works of bad and nasty art. This was visionary work that obsessively combined images and text and featured apocalyptic biblical imagery, flying saucers from outer space and popular cultural icons such as Elvis Presley, Marilyn Monroe, Henry Ford, Mona Lisa and George Washington. In the 1980s and 90s he developed cult celebrity status and he appeared in the Venice Biennale and on the Tonight Show. His work graced the album covers of bands such as R.E.M. and Talking Heads. This book explores the life and religious artistic significance of Finster and his work from the personal perspective of religion scholar Norman Girardot, friend to Finster and his family during the later years of the artist's life.

The Physics of Immortality Frank J. Tipler, 1997-09-18. Is there a higher power in the universe? What happens to us when we die? Leading physicist Frank J. Tipler tackles these questions and more in an astonishing and profoundly important book that scientifically proves the existence of God and the physical resurrection of the dead.

*Science of Fungi in Grapevine* Olivier Viret, Katia Gindro, 2024-10-28. This open access book provides a comprehensive exploration of the relationship between fungi and grapevines, covering contemporary mycological classifications, pathogens, the mycobiome, endophytes and mycorrhizae. Inspired by the French book *La Vigne Maladies Fongiques* by the same authors, which won first prize at the 2015 OIV book competition (Organisation Internationale de la Vigne et du Vin, Dijon), this work aims to extend and update that foundational text. The introduction delves into the origins and adaptability of grapevines in response to evolving fungal diseases, alongside an overview of their biology, epidemiology and control measures. The second chapter covers the systematics of the genus *Vitis*, the developmental stages of the vine, the anatomy of various organs, the history and breeding of resistant varieties and the natural defense mechanisms of grapevines against fungal infections. A significant portion of the book provides the latest insights into mycology, including chapters on fungal systematics and taxonomy as well as the concepts of holobiome, microbiome and mycobiome in relation to grapevines. The third part focuses on fungal diseases affecting green organs, wood and roots, illustrated at macroscopic, microscopic and ultrastructural levels and includes discussions on disease cycles and epidemiology. Additionally, there is a chapter dedicated to grafting systems and the specificity of fungi in nurseries. The final chapter addresses the control of fungal diseases from historical perspectives to modern chemical groups of active ingredients, natural fungicides and comprehensive disease management strategies. This includes application techniques, calibration of spraying equipment, drift reduction and proper storage and handling of fungicides. This open access book serves as a key reference on the complex interactions between fungi and grapevines for

*The Human Phenomenon* Sarah Appleton-Weber, 2003-09-01 In this work Teilhard guides the reader back in space time to experience the birth of our planet as it imprisons the human future in its globe and motion then forward through the emergence of life and the birth of thought and socialization *Interactions Between Iranian and American Literatures* Naghmeh Esmaeilpour, 2024-05-14 Introducing narrative mobility as a new approach in comparative studies of Iran and the US this book reinterprets the politics and aesthetics of relations between the nations through an analysis of Iranian and American authors The book focuses specifically on three authors Simin Daneshvar Shahriar Mandanipour and Don DeLillo who each employ narrative mobility to rethink intercultural negotiation addressing parallel issues in America and Iran from different but complementary perspectives The book analyzes the employment of parallel narrational techniques presenting physically and virtually mobile characters who embody their respective countries as they move from one culture to another The strange affinity between Iran and the US is ultimately revealed by viewing literary works as a contact zone through which the complicated relations and shared history of the two nations can be renegotiated On a more theoretical level the book reflects on the role of literature in particular the novel as a transnational medium as a bridge between nations in a period of globalization With its focus on cross cultural connections the book will be of interest to anyone studying or researching comparative literature US Iran relations and cultural studies generally *Directions in General Relativity:*

*Volume 2* B. L. Hu, Michael P. Ryan, T. A. Jacobson, C. V. Vishveshwara, 1993-07-22 These two volumes are the proceedings of a major International Symposium on General Relativity held at the University of Maryland in March 1993 to celebrate the sixtieth birthdays of Professor Charles Misner and Professor Dieter Brill The volumes cover classical general relativity quantum gravity and quantum cosmology canonical formulation and the initial value problem topology and geometry of spacetime and fields mathematical and physical cosmology and black hole physics and astrophysics As invited articles the papers in these volumes have an aim which goes beyond that of a standard conference proceedings Not only do the authors discuss the most recent research results in their fields but many also provide historical perspectives on how the subjects have developed and offer individual insights in their search for new directions

**Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

*Storied Deserts* Celina Osuna, Aidan Tynan, 2024-06-28 Storied Deserts makes a crucial and critical intervention in the field of environmental humanities by showcasing an emerging body of research on desert places from around the world Deserts despite dominant stereotypes of wasteland and barrenness are culturally and ecologically abundant places This edited volume sets out to reimagine the world's desert places and the very concept of the desert itself taking a boldly interdisciplinary and multicultural approach Authors engage in literary ecocriticism and ecopoetics film and visual studies critical theory personal and transdisciplinary reflection creative practices and historical scholarship Through their diverse range of perspectives contributors show how arid lands have been and can be understood as sites of narrative production places where signs and imaginaries are born from the materialities of space and entanglement In this way this volume highlights how the storied matter of the Earth's deserts informs lived realities environmental histories cinematic and literary imaginaries political conflicts and even intellectual categories such as the human and the elemental Ultimately this book shows that reimagining desert places can help us to grapple with the epochal challenges of the Anthropocene It is an

important and engaging collection for scholars and students across disciplines that helps establish the value of desert humanities
