Entgegen der beobachtbaren Abbildungsvielfalt insbesondere in der IFRS Bilanzierungspraxis können dadurch eindeutige Problemlösungen vieler Fallkonstellationen erzielt werden.

**The Fusion of Accounting and Accountability** Valentina Minutiello, 2025-01-29 In recent decades a growing awareness of companies' important role within society emerged. Companies are considered accountable for their actions and their commitment to sustainability has become essential. Sustainability is a critical success factor and a source of competitive advantage that guarantees survival over time. The process of change necessarily passes through corporate disclosure; consequently, many businesses have begun to incorporate environmental and social issues in their reports to demonstrate their commitment. This trend highlights the need to systematize the main non-financial reporting tools available to companies. In light of these premises, this book investigates the topic of non-financial disclosure by analyzing and comparing the main reporting tools used. It also discusses three case studies as practical examples of the implementation of Sustainability or Integrated Reporting. The different case studies represent a useful tool for comparing the different types of non-financial reports and provide a guide for companies in the process of implementing and drafting a non-financial report.

**Management Consultancy Insights and Real Consultancy Projects** Graham Manville, Olga Matthias, Julian Campbell, 2017-10-05 The field of management consultancy research has grown rapidly in recent years. Fuelled by the drivers of complexity and uncertainty, a growing number of organizations, both profit and third sector alike, are looking at management consultancy to assist in their aims for development and change. Consultants have become a common feature in organizational change initiatives, involved in both providing advice and in implementing ideas and solutions. However, despite this growing recognition and influence, management consultancy is still often misunderstood or criticized for its lack of theoretical underpinning. The book seeks to address these issues by offering applied theoretical insights from academics that both teach and practice management consultancy. Written by recognized experts in their field, the contributors combine original insights with authoritative analysis. Uniquely, this book identifies emerging themes with critical discourse and provides rich empirical case study evidence to show the reader how management consultancy projects are implemented. Real world international consultancy projects are featured as written up cases featuring organizations from multi-national corporations to the public sector. Written for graduate level managers or those who have practical leadership experience, this book will enable readers to apply management consultancy models beyond a classroom context.
