Crypto-Finance, Law and Regulation Joseph Lee, 2022-02-17. Crypto Finance Law and Regulation investigates whether crypto finance will cause a paradigm shift in regulation from a centralised model to a model based on distributed consensus. This book explores the emergence of a decentralised and disintermediated crypto market and investigates the way in which it can transform the financial markets. It examines three components of the financial market: technology, finance, and the law, and shows how their interrelationship dictates the structure of a crypto market. It focuses on regulators' enforcement policies and their jurisdiction over crypto finance operators and participants. The book also discusses the latest developments in crypto finance and the advantages and disadvantages of crypto currency as an alternative payment product. It also investigates how such a decentralised crypto finance system can provide access to finance, promote a shared economy, and allow access to justice. By exploring the law, regulation, and governance of crypto finance from a national, regional, and global viewpoint, the book provides a fascinating and comprehensive overview of this important topic and will appeal to students, scholars, and practitioners interested in regulation, finance, and the law.
