Pyropolitics When The World Is Ablaze:

Pyropolitics Michael Marder, 2014-12-12 A highly original theory of the political the book explores the literal and metaphorical flare ups in political theology revolutionary thought radical protests and global energy production

Pyropolitics in the World Ablaze Michael Marder, 2020-11-09 From books and heretics burnt on the pyres of the Inquisition to self immolations at protest rallies from the burning of fossil fuels to inflammatory speech from the imagery of revolutionary sparks ready to ignite the spirits of the oppressed to car bombings and scorched earth policy fire proves to be an indispensable element of the political Pyropolitics in the World Ablaze builds upon the scintillating by turns horrifying and hopeful images and realities of flames hearths sparks immolations melting pots incinerations and burning in political thought and practices Relying on classical political theory theology philosophy literature and cinema as well as an analysis of current events Michael Marder argues that geo politics or the politics of the Earth has always had an unstable at once shadowy and blinding underside pyro politics or the politics of fire If this obscure double of geopolitics is increasingly dictating the rules of the game today then it is crucial to learn to speak its language to discern its manifestations and to project where our world ablaze is heading This new edition includes recent examples of the uses and accusations of incendiary speech both by Donald Trump and by European populist right and exploration of threats of global warming that have now reached a turning point in our collective relation to the dangers and promises of fire *Building a New World* Luce Irigaray, Michael

Marder, 2015-06-08 With an original introduction by Luce Irigaray and original texts from her students and collaborators this book imagines the outlines of a more just ecologically attuned world that flourishes on the basis of sexuate difference The End of the World Marcia Sa Cavalcante Schuback, Susanna Lindberg, 2017-03-29 The end of the world opens up philosophical questions concerning the very notion of the world which is a fundamental element of all existential phenomenological and hermeneutical philosophy Is the end of the world for us somebody's death the end of being in the world or the extinction of many or of all the end of the world itself Is the erosion of the world a phenomenon that does not in fact affect the notion of the world as a fundamental feature of all existential ontological inquiry This volume examines the present state of these concerns in philosophy film and literature It presents a philosophical hermeneutics of the present state of the world and explores the principal questions of the philosophical accounts of the end of the world such as finality and finitude It also shows how literature and cinema have ventured to express the end of the world while asking if a consequent expression of the end of the world is also an end of its expression **Burning Matters** Peter C. Little, 2022 Global trade in electronic

waste e waste has led to various waste management challenges and many regions of the Global South have suffered the toxic consequences In *Burning Matters* Peter C Little explores the complex cultural economic and environmental health politics of e waste work in Ghana He brings to light the lived experiences of Ghana's e waste workers as they navigate the health social and economic challenges of highly toxic e waste labor In particular Little engages the experiences of e waste workers who

burn bundles of electrical cables to extract copper a practice that contaminates bodies and the urban environment and which has attracted international organizations seeking to mitigate risk and find quick tech solutions to this highly toxic e waste work A nuanced perspective on e waste burning and environmental politics in Africa at a time when global e waste generation and trade is at an all time high Burning Matters contends that e waste interventions devoid of ethnographic perspective and knowledge risk downplaying the vibrant complexities of e waste itself and the matters of social life and labor that matter most to Ghana's e waste workers

Carl Schmitt Between Technological Rationality and Theology Hugo Herrera, 2020-06-01 Carl Schmitt one of the most influential legal and political thinkers of the twentieth century is known chiefly for his work on international law sovereignty and his doctrine of political exception This book argues that greater prominence should be given to his early work in legal studies Schmitt himself repeatedly identified as a jurist and Hugo E Herrera demonstrates how for Schmitt law plays a key role as an intermediary between ideal conceptual theory and the complexity of practical concrete situations Law is concerned precisely with balancing the extremes of theory and reality and in this respect Schmitt associates it with philosophical thinking broadly as being able to understand and explain the tensions in human experience Reviewing and analyzing prevailing interpretations of Schmitt by Jacques Derrida Heinrich Meier and others Herrera argues that the importance of Schmitt's legal framework is both significant and overlooked

Eco-Deconstruction Philippe Lynes, David Wood, 2018-03-27 Eco Deconstruction marks a new approach to the degradation of the natural environment including habitat loss species extinction and climate change While the work of French philosopher Jacques Derrida 1930 2004 with its relentless interrogation of the anthropocentric metaphysics of presence has already proven highly influential in posthumanism and animal studies the present volume drawing on published and unpublished work by Derrida and others builds on these insights to address the most pressing environmental issues of our time The volume brings together fifteen prominent scholars from a wide variety of related fields including eco phenomenology eco hermeneutics new materialism posthumanism animal studies vegetal philosophy science and technology studies environmental humanities eco criticism earth art and aesthetics and analytic environmental ethics Overall eco deconstruction offers an account of differential relationality explored in a non totalizable ecological context that addresses our times in both an ontological and a normative register The book is divided into four sections Diagnosing the Present suggests that our times are marked by a facile flattened out understanding of time and thus in need of deconstructive dispositions Ecologies mobilizes the spectral ontology of deconstruction to argue for an originary environmentality the constitutive ecological embeddedness of mortal life Nuclear and Other Biodegradabilities examines remains including such by products and disintegrations of human culture as nuclear waste environmental destruction and species extinctions Environmental Ethics seeks to uncover a demand for justice including human responsibility for suffering beings that emerges precisely as a response to original differentiation and the mortality and unmasterable alterity it installs in living beings As

such the book will resonate with readers not only of philosophy but across the humanities and the social and natural sciences

Political Categories Michael Marder, 2019-03-12 Western philosophy has been dominated by the concept or the idea the belief that there is one sovereign notion or singular principle that can make reality explicable and bring all that exists under its sway In modern politics this role is played by ideology Left right or center political schools of thought share a metaphysics of simplification We internalize a dominant largely unnoticeable framework oblivious to complex plural and occasionally conflicting or mutually contradictory explanations for what is the case In this groundbreaking work Michael Marder proposes a new methodology for political science and philosophy one which he terms categorial thinking In contrast to the concept no category alone can exhaust the meaning of anything categories are so many folds complications respectful of multiplicity Ranging from classical Aristotelian and Kantian philosophies to phenomenology and contemporary politics Marder's book offers readers a theoretical toolbox for the interpretation of political phenomena processes institutions and ideas His categorial apparatus encompasses political temporality and spatiality the revolutionary and conservative modalities of political actuality possibility and necessity quantitative and qualitative approaches to the study of political reality the meaning of political relations and various senses of political being Under this lens the political appears not as a singular concept but as a family of categories allowing room for new plural and often antagonistic ideas about the state the people sovereignty and power

The Green Thread Patrícia Vieira, Monica Gagliano, John Charles Ryan, 2015-12-24 The Green Thread Dialogues with the Vegetal World is an interdisciplinary collection of essays in the emerging field of Plant Studies The volume is the first of its kind to bring together a dynamic body of scholarship that shares a critique of long standing human perceptions of plants as lacking autonomy agency consciousness and intelligence The leading metaphor of the book the green thread echoing poet Dylan Thomas phrase the green fuse carries multiple meanings On a more apparent level the green thread is what weaves together the diverse approaches of this collection an interest in the vegetal that goes beyond single disciplines and specialist discourses and one that not only encourages but necessitates interdisciplinary and even interspecies dialogue On another level the green thread links creative and historical productions to the materiality of the vegetal a reality reflecting our symbiosis with oxygen producing beings In short The Green Thread refers to the conversations about plants that transcend strict disciplinary boundaries as well as to the possibility of dialogue with plants

The Future of Meat Without Animals Brianne Donaldson, Christopher Carter, 2016-08-16 Plant based and cell cultured meat milk and egg producers aim to replace industrial food production with animal free fare that tastes better costs less and requires a fraction of the energy inputs These products are no longer relegated to niche markets for ethical vegetarians but are heavily funded by private investors betting on meat without animals as mass market environmentally feasible alternatives that can be scaled for a growing global population This volume examines conceptual and cultural opportunities entanglements and pitfalls in moving global meat egg and dairy consumption toward these animal free options Beyond

surface tensions of meatless meat and animal free flesh deeper conflicts proliferate around naturalized accounts of human identity and meat consumption as well as the linkage of protein with colonial power and gender oppression What visions and technologies can disrupt modern agriculture What economic and marketing channels are required to scale these products What beings and ecosystems remain implicated in a livestock free food system A future of meat without animals invites adjustments on the plate but it also inspires renewed habits of mind as well as life affirming innovations capable of nourishing the contours of our future selves This book illuminates material and philosophical complexities that will shape the character of our future s of food **Heidegger and the Global Age** Antonio Cerella,Louiza Odysseos,2017-10-18

Globalization is one of the most contested and abused concepts of our time Whether one interprets it as a collective illusion or as the final stage of capitalism as uncontrollable multitude or as a radical opening of new spaces of freedom the global age represents the conceptual and existential background of our being in the world But what lies behind this process What mode of human existence is brought about by the age of technology and global mobilization And is it possible to attempt a unitary interpretation of this age that presents itself as both total and pluralistic This volume rethinks these epochal questions in light of Martin Heidegger s complex hermeneutics proposing at the same time that such questions enable the interrogation of some of its most fundamental aspects the metanarrative of Seinsgeschichte as withdrawal of Being the structure of human existence within the frame of technology the relation between humanism and nihilism as well as politics and technology the changing character of subjectivity in the age of the world picture the mythopoeic force of art and the uprooting of human beings As this volume shows interrogating Heidegger s thought has significant potential for both International Political Theory and also the analysis of specific concepts and dynamics in contemporary international studies such as the changing character of spatiality temporality and subjectivity **The Cambridge Handbook of Environmental Sociology: Volume 2** Katharine Legun,Julie C. Keller,Michael Carolan,Michael M. Bell,2020-12-03

The Cambridge Handbook of Environmental Sociology is a go to resource for cutting edge research in the field This two volume work covers the rich theoretic foundations of the sub discipline as well as novel approaches and emerging areas of research that add vitality and momentum to the discipline Over the course of sixty chapters the authors featured in this work reach new levels of theoretical depth incorporating a global scope and diversity of cases This book explores the broad scope of crucial disciplinary ideas and areas of research extending its investigation to the trajectories of thought that led to their unfolding This unique work serves as an invaluable tool for all those working in the nexus of environment and society *The Task of Philosophy in the Anthropocene* Richard Polt,Jon Wittrock,2018-04-06 In its early modern form philosophy gave a decisive impetus to the science and technology that have transformed the planet and brought on the so called Anthropocene Can philosophy now help us understand this new age and act within it The contributors to this volume take a broad historical view as they reflect on the responsibilities and possibilities for philosophy today The term Anthropocene signifies the era of the arrival of human beings

as a force that affects global ecosystems in ways that are potentially disastrous for humanity itself as well as for countless other species This volume explores whether philosophy has meaningful tasks to fulfill in this unparalleled situation Do philosophers need to reflect on new topics today Do they need to think in new ways Do they need new relationships to their own tradition And are there concrete actions they should take over and above philosophical reflection The contributors to this volume thus take on the question of the relevance and responsibility of philosophy drawing upon diverse legacies in the current global situation

Hegel's Energy Michael Marder,2021-05-15 Hegel's *The Phenomenology of Spirit* has been one of the most important works of philosophy since the nineteenth century while the question of energy has been crucial to life in the twenty first century In this book Michael Marder integrates the two narrating a story about the trials and tribulations of energy embedded in Hegel's dialectics Through an original interpretation of actuality Wirklichkeit as energy in the Hegelian corpus the book provides an exciting lens for understanding the dialectical project and the energy starved condition of our contemporaneity To elaborate this theory Marder undertakes a meticulous rereading of major parts of the *Phenomenology* where the energy deficit of mere consciousness gives way to the energy surplus of self consciousness and its self delimitation in the domain of reason In so doing he denounces the current understanding of energy as pure potentiality linking this mindset to pollution profit driven economies and environmental crises Surprising and deeply engaged with its contemporary implications this book doesn't simply illuminate aspects of *The Phenomenology of Spirit* it provides an entirely new understanding of Hegel's ideas

[Energy Dreams](#) Michael Marder,2017-03-21 The question of energy is among the most vital for the future of humanity and the flourishing of life on this planet Yet only very rarely if at all do we ask what energy is what it means what ends it serves and how it is related to actuality meaning making and instrumentality *Energy Dreams* interrogates the ontology of energy from the first coinage of

the word *energeia* by Aristotle to the current practice of fracking and the popularity of energy drinks Its sustained multi disciplinary investigation builds a theoretical infrastructure for an alternative energy paradigm This study unhinges stubbornly held assumptions about energy conceived in terms of a resource to be violently extracted from the depths of the earth and from certain living beings such as plants converted into biofuels a thing that teetering on the verge of depletion sparks off movement and is incompatible with the inertia of rest Consulting the insights of philosophers theologians psychologists and psychoanalysts economic and political theorists and physicists Michael Marder argues that energy is not only a coveted object of appropriation but also the subject who dreams of amassing it that it not only resides in the dimension of depth but also circulates on the surface that it activates rest as much as movement potentiality as much as actuality and that it is both the means and the end of our pursuits Ultimately Marder shows that instead of being grounded in utopian na vet the dreams of another energy to be procured without devastating everything in existence derive from the suppressed concept of energy itself

Narratives of Scale in the Anthropocene Gabriele Dürbeck, Philip Hüpkes, 2021-07-26 The Anthropocene concept draws attention to the various forms of entanglement of social political ecological biological and geological processes at multiple spatial and temporal scales The ensuing complexity and ambiguity create manifold challenges to widely established theories methodologies epistemologies and ontologies The contributions to this volume engage with conceptual issues of scale in the Anthropocene with a focus on mediated representation and narrative They are centered around the themes of scale and time scale and the nonhuman and scale and space The volume presents an interdisciplinary dialogue between sociology geography political sciences history and literary cultural and media studies Together they contribute to current debates on the re imagining of forms of human responsibility that meet the challenges created by humanity entering an age of scalar complexity Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/e/9781003136989>

Ardeth #09 Felipe Hernández, 2022-12-06 Architecture is an inward looking discipline Its history conveys the norms of the discipline to an audience composed mostly of architects who are familiar with the work of their predecessors from whom they learnt or for whom they worked As such architecture singularises the multiple processes through which space is produced excluding difference in the pursuit of coherent narratives to sustain its authority and does so mainly through the figure of the architect For a long time now critics have shown how that figure is principally male However little has been said about the fact that the figure of the architect is also white a racial classification that refers not only to epidermal characteristics but to their national origin education and in most cases their class affiliation

Portuguese Literature and the Environment Victor K. Mendes, Patrícia Vieira, 2019-06-03 Portuguese Literature and the Environment explores the relationship between Portuguese literature and the environment from Medieval times to the present From the centrality of nature in Medieval poetry through the bucolic verse of the Renaissance all the way to the

Romantic and post Romantic nostalgia for a pristine natural or rural landscape under threat in the wake of industrialization Portuguese literature has frequently reflected on the connection between humans and the natural world More recently the postcolonial turn in contemporary literature has highlighted the contrast between the environment of the former colonies and that of Portugal Contributors to the collection examine how Portuguese writers engage with the environment and have incorporated nature in their texts not only to prompt social political or philosophical reflections on human society but also as a way to learn from non humans The book is organized into three sections The first explores the relationship between Portuguese philosophy historiography culture and environmental issues The second section discusses the link between literary texts and the environment from the Renaissance to 1900 The final section analyzes the connection between literary movements or specific authors and environmental change from 1900 to today Scholars of literature Latin American studies literature and environmental studies will find this volume especially useful

Arctic Abstractive Industry Arthur Mason, 2022-04-08 Through diverse engagements with natural resource extraction and ecological vulnerability in the contemporary Arctic contributors to this volume apprehend Arctic resource regimes through the concept of abstraction Abstraction refers to the creation of new material substances and cultural values by detaching parts from existing substances and values The abstractive process differs from the activity of extractive industries by its focus on the conceptual resources that conceal processes of exploitation associated with extraction The study of abstraction can thus help us attune to the formal operations that make appropriations of value possible while disclosing the politics of extraction and of its representation
