A Maltese Micro Manufacturing firm under review*

Edward de Brincat,2014-02-01 Manufacturing companies including a local micro enterprise Quality Postform Ltd are persistently facing competitive pressures as a consequence of customers demanding higher quality products The emergence of Quality Management has been attributed by many researchers and Quality Gurus including Phil Crosby as a strategic imperative for typical organisations to survive within a highly competitive environment Nevertheless research carried out throughout the past years is relatively restricted regarding the practicality of micro manufacturing firms in implementing Crosby s Quality Improvement Programme which is claimed to be highly beneficial in typical situations This dissertation seeks to investigate this scenario from both a descriptive and critical perspective towards Quality Postform Ltd

The research provides a critical evaluation of the academic contributions towards the quality management concept. Distinct disputed viewpoints have been identified focusing on Crosby's 14 Step Quality Improvement Programme. From one end of the spectrum, supporters uphold that claimed benefits have been acknowledged. Alternatively, others sustain that in essence a Quality Improvement Programme is counterproductive in terms of its application within Small and Medium sized Enterprises. However, the researcher has identified four key pre-requisites in order for micro firms to effectively implement Crosby's programme. These include management commitment, the acknowledgement of a quality problem, the organisation's readiness to embrace change together with the suppliers' readiness to support the quality programme. The methodology applied to assess the presence of these four pre-requisites at QPL was to compile primary qualitative data through one-to-one face-to-face interviews with key management officials. This approach is justified due to the absence of formalised documentation and as a result, it is imperative to assess that historical data on Quality Systems is seriously lacking at QPL. The field research outcome reveals that QPL's management is experiencing serious doubts regarding the feasibility and practicality of the programme's implementation within a micro manufacturing firm. This is the case primarily whenever the latter is facing limited financial and human resource capabilities such as at QPL. The research findings disclose that none of the four pre-requisites are present within this micro firm. Moreover, it confirms the scepticism on the part of

Quality Management Reconsidered for the Digital Economy continues to provide a one-stop shop for anyone studying the theory and practice of quality management. Exploring the essentials of management theory and the work of the quality gurus who have formed the foundation of current practice, this new edition builds upon the previous editions' unique critical perspective of quality. Key management practices are considered and extended, including lean thinking, systems methodologies, business process reengineering, organisational learning and intelligent organisations, and service quality management. This edition plays particularly close attention throughout to the impact of the 4th Industrial Revolution on quality management, revisiting the meaning of quality in an automated and data-driven world. Throughout, case studies have been rewritten, including new examples from emerging economies and practical tools incorporated to enhance learning and application. Replete with examples, vignettes and diagrams, this comprehensive textbook is ideal for those new to the field of quality management and for students on advanced undergraduate and postgraduate courses in Operations Management. Online resources include chapter-by-chapter PowerPoint slides and a test bank of questions.

Quality Management for Competitive Advantage in Global Markets Saiz-Álvarez, José Manuel, Olalla-Caballero, Beatriz, 2020-09-04

Quality should be treated as a culture of success in the market. Enterprises focused on quality will survive in the long term in this new environment because quality is what may create a real and robust link between a company and its clients, and these clients should always be considered the heart of any business.
