Quantitative Methods 4th Edition Donald Waters:

Quantitative Methods for Business C. Donald J. Waters, 2008 Quantitative Methods for Business has been thoroughly revised and updated for this 4th edition and continues to provide a simple and practical introduction to an area that students can find difficult. The book takes a non-threatening approach to the subject, avoiding excessive mathematics and abstract theory. It shows how to apply quantitative ideas to the real problems faced by managers. The book includes numerous exercises and examples that help students understand the relevance of quantitative ideas to business. Assuming no previous knowledge, the text provides complete coverage for a first course in quantitative methods. **QFINANCE** Bloomsbury Publishing, 2014-11-20 **QFINANCE The Ultimate Resource** 5th edition is the first step reference for the finance professional or student of finance. Its coverage and author quality reflect a fine blend of practitioner and academic expertise whilst providing the reader with a thorough education in the many facets of finance. **Online Film Production in China Using Blockchain and Smart Contracts** Patrice Pujol, 2019-03-04 This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in-depth on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, *Online Film Production in China Using Blockchain and Smart Contracts* explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content, whether these works are related to film, Virtual Reality, VR, video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry, as well as computer science. **QFinance**, 2009-10-13 Compiled by more than 300 of the world's leading professionals, visionaries, writers, and educators, this is THE first stop reference resource and knowledge base for finance. **QFINANCE** covers an extensive range of finance topics with unique insight, authoritative information, practical guidance, and thought-provoking wisdom.
