**History of Technology Volume 29** Ian Inkster,2016-09-30 The common question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man Rather educated gents practitioners instrument makers craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental commercial and cognitive resources required to pursue innovative production projects

**Water for Peace: Water supply technology** ,1968 *Progress in Refrigeration Science and*

*Technology* Sam Stuart, 2014-05-12 Progress in Refrigeration Science and Technology Volume II is a collection of papers from the Eleventh International Congress of Refrigeration held in Munich in August-September 1963. These papers deal with the various scientific and technical aspects, designs and technology of refrigeration used in food as well as advances in air conditioning and heat pumps. One paper discusses the refrigeration of meat, fruit or vegetables and the reaction rate of proteolysis in low temperatures. The paper points out that meat preservation by freezing is not economical below 60 degrees centigrade, citing the reason that cathepsins are still catalytically active in lower temperatures. Other papers discuss the effects of freezing of beef, pork, turkey, chicken, sweet corn, spinach, puree. As regards fruit and vegetable storage, the air needs to be purified to inhibit infections, retard fungal or bacterial growth and dissipate ripening gases or foul odors. Another paper examines the reasons for doing away with floor insulation in refrigeration plants used in storing fresh meat during the summer and winter months. This collection is suitable for engineers in the area of refrigeration and also for food technologists involved in food research and preservation.

**New Silent Cinema** Katherine Groo, Paul Flaig, 2015-09-16 With the success of Martin Scorsese's *Hugo* (2011) and Michel Hazanavicius's *The Artist* (2011), nothing seems more contemporary in recent film than the styles, forms and histories of early and silent cinemas. This collection considers the latest return to silent film alongside the larger historical field of visual repetitions and affective currents that wind their way through 20th and 21st century visual cultures. Contributors bring together several fields of research including early and silent cinema studies, experimental and new media historiography and archive theory and studies of media ontology and epistemology. Chapters link the methods, concerns and concepts of early and silent film studies as they have flourished over the last quarter century to the most recent developments in digital culture from YouTube to 3D recasting, this contemporary phenomenon in popular culture and new media against key debates and concepts in silent film scholarship. An interview with acclaimed Canadian filmmaker Guy Maddin closes out the collection.

**Enjeux européens et mondiaux de la protection des données personnelles** Alain Grosjean, 2016-02-10 Cet ouvrage offre une analyse des grands enjeux en matière de protection des données caractéristique du personnel la lumière des dispositions de la proposition de règlement européen et des législations européennes en vigueur. Nous assistons actuellement à une véritable révolution sociale, économique et technologique. L'exploitation des données avec le big data, l'internet des objets va changer le monde.
