

Electrostatics

1. Three identical charge's each having a value $1.0 \times 10^{-6} \text{C}$, are placed at the corner of an equilateral triangle of side 20 cm. What is the force acting on unit positive charge at the centre.

1. 0.
Zero

F_{net} toward center is zero

Therefore, $\frac{v^2}{r} = 0$

2. Calculate the electric field intensity E which would be just sufficient to balance the weight of an electron. If this electric field is produced by a second electron located below the first one what would be the distance between them ?
(Given : $e = 1.6 \times 10^{-19} \text{C}$, $m = 9.1 \times 10^{-31} \text{kg}$ and $g = 9.8 \text{m/s}^2$)

2. 5.

As force on a charge e in an electric field E

$$F_e = eE$$

So according to given problem

$$F_e = W$$

$$\text{i.e., } eE = mg$$

$$\text{i.e., } E = \frac{mg}{e} = \frac{9.1 \times 10^{-31} \times 9.8}{1.6 \times 10^{-19}} = 5.57 \times 10^{-11} \frac{\text{V}}{\text{m}}$$

Elements of Early Modern Physics J. L. Heilbron, 2024-03-29
Elements of Early Modern Physics comprises the two long introductory chapters of J L Heilbron s monumental work Electricity in the 17th and 18th Centuries A Study of Early Modern Physics plus a concluding summary of the remaining chapters Heilbron opens with a presentation of the general principles of physical theory and a description of the institutional frameworks in which physics were cultivated in the seventeenth and eighteenth centuries He argues that the single most important contributor to physics in the seventeenth century was the Catholic Church In the first half of the eighteenth century Cartesian and Newtonian physicists disagreed over principles but thought in similar terms and cultivated the same sort of qualitative natural philosophy Work towards an exact physics which took on important dimensions after 1770 confounded the programs of both Heilbron shows that by attending too closely to the Copernican revolution and the confrontation of great philosophical systems historians have seriously misjudged the character of early modern science This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was
