Identifying, Measuring, and Valuing Knowledge-Based Intangible Assets: New Perspectives Vallejo-Alonso, Belen, Rodriguez-Castellanos, Arturo, Arregui-Ayastuy, Gerardo, 2010-10-31 The main scope of the book is to highlight the importance of intangible resources in business management evidenced in their measurement and financial valuation and the need for a strategic analysis that enables them to be identified and then assessed Provided by publisher *Selected Papers of Abdus Salam* Abdus Salam, Ahmed Ali, 1994 This is a selection from over 250 papers published by Abdus Salam Professor Salam has been Professor of Theoretical Physics at Imperial College London and Director of the International Centre for Theoretical Physics in Trieste for which he was largely responsible for creating He is one of the most distinguished theoretical physicists of his generation and won the Nobel Prize for Physics in 1979 for his work on the unification of electromagnetic and weak interactions He is well known for his deep interest in the development of scientific research in the third world to which ICTP is devoted and has taken a leading part in setting up the Third World Academy His research work has ranged widely over quantum field theory and all aspects of the theory of elementary particles and more recently into other fields including high temperature superconductivity and theoretical biology The papers selected represent a cross section of his work covering the entire period of 50 years from his student days to the present **Context-Aware Systems and Applications, and Nature of Computation and Communication** Phan Cong Vinh, Vangalur Alagar, 2018-12-29 This book constitutes the refereed post conference proceedings of the International Conferences ICCASA and ICTCC 2018 held in November 2018 in Viet Tri City Vietnam The 20 revised full papers presented were carefully selected from 30 submissions The papers of ICCASA cover a wide spectrum in the area of context aware systems CAS is characterized by its self facets such as self organization self configuration self healing self optimization self protection used to dynamically control computing and networking functions The papers of ICTCC cover formal methods for self adaptive systems and discuss natural approaches and techniques for computation and communication *Society of Petroleum Engineers Journal* Society of Petroleum Engineers of AIME., 1985 **Papers Presented at the International Conference on Physical Modelling of Multi-Phase Flow, Coventry, England, April, 1983** Herbert Simon Stephens, 1983 *Tests and Proofs* Catherine Dubois, 2009-06-29 1 This volume contains the research papers and invited papers presented at the Third International Conference on Tests and Proofs TAP 2009 held at ETH Zurich Switzerland during July 2 3 2009 The TAP conference is devoted to the convergence of proofs and tests It combines ideas from both sides for the advancement of software quality To prove the correctness of a program is to demonstrate through impeccable mathematical techniques that it has no bugs to test a program is to run it with the expectation of discovering bugs The two techniques seem contradictory if you have proved your program it is fruitless to comb it for bugs and if you are testing it that is surely a sign that you have given up on any hope of proving its correctness Accordingly proofs and tests have since the onset of software

engineering research been pursued by distinct communities using rather different techniques and tools And yet the development of both approaches leads to the discovery of common issues and to the realization that each may need the other The emergence of model checking has been one of the first signs that contradiction may yield to complementarity but in the past few years an increasing number of research efforts have encountered the need for combining proofs and tests dropping earlier dogmatic views of incompatibility and taking instead the best of what each of these software engineering domains has to offer
