Experimental Psychology: Quantitative experiments: pt. 1. Students' manual. pt. 2. Instructor's manual Edward Bradford Titchener, 1905 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database Record c 2005 APA all rights reserved Proceedings of the Second Workshop on Artificial Intelligence for Artificial Intelligence Education Schmid, Ute, Leidner, Jochen L., Kohlhase, Michael, Wolter, Diedrich, Artificial Intelligence AI methods for education have been a topic of AI research since many decades with focus on Intelligent Tutoring Systems ITS ITS typically address a specific knowledge domain with a focus on individual learning support based on learning by problem solving identification of misconceptions and tailored feedback Methods often are a combination of knowledge based and machine learning approaches Since the emergence of technologies based on Large Language Models LLMs the use of LLMs in educational contexts has received much attention resulting in novel approaches The Second Workshop on Artificial Intelligence for Artificial Intelligence Education AI4AILearning has been held on September 24 2024 in conjunction with the 47th German Conference on Artificial Intelligence in Würzburg Germany The workshop has a focus on research of AI methods for teaching AI competencies including programming skills It provides a platform for exchange of ideas and experiences under the general theme of AI for education specialising on university education in AI The workshop includes interdisciplinary contributions from cognitive science and education technology
