Vsee Guide 2015:

A Mental Health Provider's Guide to Telehealth Jonathan G. Perle, 2021-03-31 This book works as a guide to videoconferencing practice for psychological providers through a broad simplified and practical overview of pertinent factors. It is a consolidation of research literature and professional experiences of practicing teaching and studying videoconferencing. It begins by defining key concepts such as telehealth, telepsychology, and other related terminology and examining the role of telehealth in addressing ongoing mental health disparities. An overview of existing videoconferencing practices, guidebooks, and general recommendations, as well as specifics of ethical and legal factors, are discussed. The book then details numerous essential factors of videoconferencing practice that are directly applicable to psychological care, including considerations of computer system, video camera, display screen, microphone, videoconferencing platform, bandwidth, and latency, and room setup, along with self-care practices. The appendices provide readers with links to resources, checklists, and other documents to guide their practice. Psychologists, counselors, and other mental health providers will find this user-friendly, research-informed guide indispensable when implementing online treatment and teletherapy.

A Guide to Qualitative Field Research Carol R. Bailey, Carol A. Bailey, 2017-11-04 A Guide to Qualitative Field Research provides readers with clear practical and specific instructions for conducting qualitative research in the field. In the expanded Third Edition, Carol A. Bailey gives increased attention to the early and last stages of field research, often the most difficult: selecting a topic, deciding upon the purpose of your research, and writing the final paper. All in her signature reader-friendly writing style. This edition features research examples from graduate and undergraduate students to make examples meaningful to fellow students. A new Putting It All Together feature with examples of how different parts of the research process interact and more emphasis on the nuts and bolts of research, such as what to include in an informed consent form, a proposal, and the final paper.
