

diagonally opposed so when the drive belt diameter is reduced on the primary pulley, it increases on the secondary pulley.

To pull away, a low ratio is required. To provide this, the primary pulley is open, allowing the drive belt to sit down into the pulley and forcing it to run around the outer of the closed secondary pulley. As vehicle speed increases, a higher gear ratio is required. To do this, the primary pulley gradually moves towards its fixed partner, increasing the pulley circumference. At the same time the secondary pulley is forced apart reducing pulley diameter, therefore creating a higher gear ratio. An overdrive ratio is obtained when the primary pulley is fully closed and the secondary pulley is fully open. The secondary pulley is now forced to rotate approximately two and a half time for every turn of the primary pulley.

4. Shift Positions

Possible shift positions for the VTIF are **Park**, **Reverse**, **Neutral**, **Drive** and **Sport/Manual** position (other shifter lay outs are also possible of course, for instance with an L position).

In the **Drive** position, the car will move forwards in standard CVT mode. The engine speed will be limited to approximately 4500 rpm unless kick down is used by fully depressing the throttle pedal when the engine speed will rise to approximately 5500 rpm. Of course other calibrations are also possible.

In the **Manual/Sport** position, the car will move forwards in CVT sport mode. The engine speed will be limited to approximately 5000 rpm unless kick down is used by fully depressing the throttle pedal when the engine speed will rise to approximately 5500 rpm. Again, other calibrations are also possible.

1. Illuminated gear position
2. Gear selector lever

Fig. 7: VTIF gear lever & MP+/-

In **Sport** position the transmission will be tuned in a different way than in **Drive** mode. The transmission will upshift at a higher engine speed, providing more sportive driving. The Sport driving calibration is designed to be more responsive to driver command, but will be less refined than the D position.
