This CSIS report states that terrorism is no longer the leading international threat to the United States or its top defense priority but challenges related to violent extremism remain. The threat from Salafi jihadist groups such as al Qaeda and the Islamic State has declined and ethnonationalist threats are largely contained. However, a broader patchwork of violent far-left extremist ideologies has become more prominent on the global stage. Global Environment Outlook - GEO-6: Healthy Planet, Healthy People UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental

Assembly. UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers, and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide governments, local authorities, businesses, and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO 6 outlines the current state of the environment, illustrates possible future environmental trends, and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future, emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people.
