An Appeal to Reason Nigel Lawson,2009-12-29 His insights are keen and refreshingly iconoclastic A contrarian synthesis of political thinking and economic analysis on the topic of climate change Publishers Weekly In this well informed and hard hitting response to the scaremongering of the climate alarmists Nigel Lawson former Secretary of State for Energy under Margaret Thatcher argues that it is time for us to take a cool look at global warming Lawson carefully and succinctly examines all aspects of the global warming issue the science the economics the politics and the ethics He concludes that the conventional wisdom on the subject is suspect on a number of grounds that global warming is not the devastating threat to the planet it is widely alleged to be and that the remedy being proposed which is in any event politically unattainable would be worse than the threat it is supposed to avert Argued with logic common sense and even wit and thoroughly sourced and referenced this is a long overdue corrective to the barrage of spin and hype to which the politicians and media have been subjecting the public on this important issue

The Archaeology of Volga Bulgaria in the 10th to Early 13th Centuries Konstantin A. Rudenko,2024-11-18 This book focuses on Volga Bulgaria 10th to early 13th centuries the only Muslim state in Eastern Europe before 1300 For several centuries it operated as a bridge between the Christian West and the Muslim East As such it is widely believed that the colossal transit of oriental silver coin through the state was the foundation of the Bulgar economy while Islam consolidated statehood in the Middle Volga region Drawing on the rich archaeological record Konstantin Rudenko argues against this view demonstrating that the Bulgar culture was instead formed on the basis of its own resources The Bulgars thus represent a unique example of relatively rapid change from nomadism to sedentism and urbanization with no significant influence from neighboring developed states Cultural syncretism therefore emerged as a key characteristic of Volga Bulgaria
