Choosing State Supreme Court Justices Greg Goelzhauser,2016-06-15 Since 1940 more than half of all states have switched at least in part from popular election or elite appointment to experiment with merit selection in choosing some or all of their state supreme court justices Under merit selection a commission often comprising some combination of judges attorneys and the general public is tasked with considering applications from candidates vying to fill a judicial vacancy Ostensibly the commission forwards the best candidates to the governor who ultimately appoints them Presently numerous states are debating whether to adopt or abolish merit selection In his short sharp book *Choosing State Supreme Court Justices* Greg Goelzhauser utilizes new data on more than 1 500 state supreme court justices seated from 1960 through 2014 to answer the question Does merit selection produce better types of judges He traces the rise of merit selection and explores whether certain judicial selection institutions favor candidates who have better qualifications are more diverse and have different types of professional experience Goelzhauser s results ultimately contribute to the broader debate concerning comparative institutional performance with respect to state judicial selection

the sociolegal tradition an invaluable resource for researchers and teachers Michael McCann Gordon Hirabayashi Professor for the Advancement of Citizenship University of Washington Law and society scholars challenge the common belief that law is simply a neutral tool by which society sets standards and resolves disputes Decades of research shows how much the nature of communities organizations and the people inhabiting them affect how law works Just as much law shapes beliefs behaviors and wider social structures but the connections are much more nuanced and surprising than many expect Law and Society Reader II provides an accessible overview to the breadth of recent developments in this research tradition bringing to life this dynamic field In this second volume editors Erik W Larson and Patrick D Schmidt have compiled excerpts of 43 illuminating articles published since 1993 in The Law Society Review the flagship journal of the Law and Society Association By its organization and approach this volume enables readers to join in discussing the key ideas of law and society research The selections highlight the core insights and developments in this research tradition making these works indispensable for those exploring the field and ideal for classroom use Across six concisely introduced sections it analyzes inequality lawyering the relation between law and organizations and the place of law in relation to other social institutions

Ranking Obsession Culture Sienna Vance, AI, 2025-04-07 *Ranking Obsession Culture* examines the pervasive influence of rankings on legal education impacting student choices and institutional behavior It explores how the pursuit of higher rankings affects where students choose to attend law school and how law schools allocate resources The book uniquely combines law economics psychology and sociology to provide a multifaceted understanding of this phenomenon The book delves into the psychological impact of rankings on prospective students revealing how perceptions of prestige can drive decisions and analyzes how law schools strategically adapt admissions practices to improve their ranking position It also addresses the potential distortions caused by a singular focus on metrics such as a diminished emphasis on teaching quality The text unfolds by first introducing the history of ranking systems then examining the psychological factors driving student fixation and finally exploring the ethical implications of ranking driven behavior The book offers a critical perspective on the role of rankings in shaping decisions within the legal education market By connecting to broader themes in higher education policy organizational behavior and sociology it provides insights relevant to other professional fields This analysis challenges assumptions made by students faculty and administrators advocating for a more holistic understanding of institutional value and the need for comprehensive assessment methods beyond just rankings

Engines of Anxiety Wendy Nelson Espeland, Michael Sauder, Wendy Espeland, 2016-05-09 Students and the public routinely consult various published college rankings to assess the quality of colleges and universities and easily compare different schools However many institutions have responded to the rankings in ways that benefit neither the schools nor their students In *Engines of Anxiety* sociologists Wendy Espeland and Michael Sauder delve deep into the mechanisms of law school rankings which have become a top priority within legal education Based on a wealth of observational data and over 200 in depth interviews with law students university deans and

other administrators they show how the scramble for high rankings has affected the missions and practices of many law schools *Engines of Anxiety* tracks how rankings such as those published annually by the U S News World Report permeate every aspect of legal education beginning with the admissions process The authors find that prospective law students not only rely heavily on such rankings to evaluate school quality but also internalize rankings as expressions of their own abilities and flaws For example they often view rejections from first tier schools as a sign of personal failure The rankings also affect the decisions of admissions officers who try to balance admitting diverse classes with preserving the school s ranking which is dependent on factors such as the median LSAT score of the entering class Espeland and Sauder find that law schools face pressure to admit applicants with high test scores over lower scoring candidates who possess other favorable credentials *Engines of Anxiety* also reveals how rankings have influenced law schools career service departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet *Engines of Anxiety* shows that the drive to increase a school s rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways *Worlds of Rankings* Leopold Ringel, Wendy Espeland, Michael Sauder, Tobias
