addressing major advances in knowledge and effective use of computers in a variety of application areas The 72 papers presented in this volume address the following topics social media for business enterprise systems business and gamification analytics visualization and decision making industry academia innovation and market **Samsung Gear S2 For Dummies**

Eric Butow,2016-07-25 The Gear S2 is a mobile device that offers an easy way to get information quickly by glancing at your wrist This book provides easy to follow guidance to make this new technology efficient and productive **Streaming**

Wheeler Winston Dixon,2013-05-01 Film stocks are vanishing but the iconic images of the silver screen remain albeit in new sleeker formats Today viewers can instantly stream movies on televisions computers and smartphones Gone are the days when films could only be seen in theaters or rented at video stores movies are now accessible at the click of a button and there are no reels tapes or discs to store Any film or show worth keeping may be collected in the virtual cloud and accessed at will through services like Netflix Hulu and Amazon Instant The movies have changed and we are changing with them The ways we communicate receive information travel and socialize have all been revolutionized In Streaming Wheeler Winston Dixon reveals the positive and negative consequences of the transition to digital formatting and distribution exploring the ways in which digital cinema has altered contemporary filmmaking and our culture Many industry professionals and audience members feel that the new format fundamentally alters the art while others laud the liberation of the moving image from the imperfect medium of film asserting that it is both inevitable and desirable Dixon argues that the change is neither good nor bad it s simply a fact Hollywood has embraced digital production and distribution because it is easier faster and cheaper but the displacement of older technology will not come without controversy This groundbreaking book illuminates the challenges of preserving media in the digital age and explores what stands to be lost from the rich hues of traditional film stocks to the classic movies that are not profitable enough to offer in streaming formats Dixon also investigates the financial challenges of the new distribution model the incorporation of new content such as webisodes and the issue of ownership in an age when companies have the power to pull purchased items from consumer devices at their own discretion Streaming touches on every aspect of the shift to digital production and distribution It explains not only how the new technology is affecting movies music books and games but also how instant access is permanently changing the habits of viewers and influencing our culture **Information Technology in Medical Diagnostics II** Waldemar Wójcik,Sergii Pavlov,Maksat

Kalimoldayev,2019-02-13 For many centuries mankind has tried to learn about his health Initially during the pre technological period he could only rely on his senses Then there were simple tools to help the senses The breakthrough turned out to be the discovery of X rays which gave insight into the human body Contemporary medical diagnostics are increasingly supported by information technology which for example offers a very thorough analysis of the tissue image or the pathology differentiation It also offers possibilities for very early preventive diagnosis Under the influence of information technology traditional diagnostic techniques and new ones are changing More and more often the same methods can be used

for both medical and technical diagnostics In addition methodologies are developed that are inspired by the functioning of living organisms Information Technology in Medical Diagnostics II is the second volume in a series showing the latest advances in information technologies directly or indirectly applied to medical diagnostics Unlike the previous book this volume does not contain closed chapters but rather extended versions of presentations made during two conferences XLVIII International Scientific and Practical Conference Application of Lasers in Medicine and Biology Kharkov Ukraine and the International Scientific Internet conference Computer graphics and image processing Vinnitsa Ukraine both held in May 2018 Information Technology in Medical Diagnostics II links technological issues to medical and biological issues and will be valuable to academics and professionals interested in medical diagnostics and IT

Media Convergence Handbook - Vol. 1 Artur Lugmayr, Cinzia Dal Zotto, 2015-11-20 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges Approaching the topic from a managerial technological as well as end consumer perspective it acts as a reference book and educational resource in the field Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools However it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account Media consumers content producers and managers face different challenges in the process of media convergence Volume I of the Media Convergence Handbook encourages an active discourse on media convergence by introducing the concept through general perspective articles and addressing the real world challenges of conversion in the publishing broadcasting and social media sectors *Sense of Agency: Examining Awareness of the Acting Self* Nicole David, James W Moore, Sukhvinder Obhi, 2015-07-24 The sense of agency is defined as the sense of oneself as the agent of one's own actions This also allows oneself to feel distinct from others and contributes to the subjective phenomenon of self consciousness Gallagher 2000 Distinguishing oneself from others is arguably one of the most important functions of the human brain Even minor impairments in this ability profoundly affect the individual's functioning in society as demonstrated by psychiatric and neurological syndromes involving agency disturbances Della Sala et al 1991 Franck et al 2001 Frith 2005 Sirigu et al 1999 But the sense of agency also plays a role for cultural and religious phenomena such as voodoo superstition and gambling in which individuals experience subjective control over objectively uncontrollable entities Wegner 2003 Furthermore it plays into ethical and law questions concerning responsibility and guilt For these reasons a better understanding of the sense of agency has been important for neuroscientists clinicians philosophers of mind and the general society alike Significant progress has been made in this regard For example philosophical scrutiny has helped establish the conceptual boundaries of the sense of agency Bayne 2011 Gallagher 2000

2012 Pacherie 2008 Synofzik et al 2008 and scientific investigations have shed light on the neurocognitive basis of sense of agency including the brain regions supporting sense of agency Chambon et al 2013 David et al 2007 Farrer et al 2003 2008 Spengler et al 2009 Tsakiris et al 2010 Yomogida et al 2010 Despite this progress there remain a number of outstanding questions such as Are there cross cultural differences in the sense of agency How does the sense of agency develop in infants or change across the lifespan How does social context influence sense of agency What neural networks support sense of agency i e connectivity and communication between brain regions What are the temporal dynamics with respect to neural processes underlying the sense of agency i e the what and when of agency processing How can different cue models of the sense of agency be further specified and empirically supported especially with regards to cue integration weighting What are the applications of sense of agency research clinically engineering etc The concept of the sense of agency offers intriguing avenues for knowledge transfer across disciplines and interdisciplinary empirical approaches especially in addressing the afore mentioned outstanding questions The aim of the present research topic is to promote and facilitate such interdisciplinarity for a better understanding of why and how we typically experience our own actions so naturally and undoubtedly as ours and what goes awry when we do not We thus welcome contributions from for example i neuroscience and psychology including development psychology neuroscience ii psychiatry and neurology iii philosophy iv robotics and v computational modeling In addition to empirical or scientific studies of the sense of agency we also encourage theoretical contributions including reviews models and opinions
