**Dynamics of World History** Christopher Dawson, 2014-05-20 In scope and in vision Christopher Dawson's historiography ranks with the work of men like Spengler Northrop and Toynbee Several major themes run through Dawson's work but perhaps his most unique contribution was his insistence on the importance of religion in shaping and sustaining civilizations Religion Dawson believed is the great creative force in any culture and the loss of a

society's historic religion therefore portends a process of social dissolution For this reason Dawson concluded that Western society must find a way to revitalize its spiritual life if it is to avoid irreversible decay Progress the real religion of modernity is insufficient to sustain cultural health And an ahistorical secularized Christianity is an oxymoron a pseudo religion only nominally related to the historic religion of the West Dawson maintained that the hope of the present age lay in the reconciliation of the religious tradition of Christianity with the intellectual tradition of humanism and the new knowledge about man and nature provided by modern science Dynamics of World History shows that though such a task may be difficult it is not impossible

**The Patchwork of World History in Texas High Schools** Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework

patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States Jesus Christ in World History Jan A.
