

# World Regions

The background of the book cover is a photograph of a city skyline, likely Hong Kong, with numerous skyscrapers visible. In the foreground, several large, traditional Chinese lanterns are strung across the frame. There are three large yellow lanterns and several red lanterns of various sizes. The sun is visible behind the city, creating a bright glow and casting long shadows. The sky is a mix of blue and white clouds.

**Century** Samiul Hasan,2012-01-15 Islam is not only a religion but also a culture tradition and civilization There are currently

1.5 billion people in the world who identify themselves as Muslim. Two thirds of the worldwide Muslim population i.e. approximately a billion people live in forty eight Muslim majority countries MMC in the world all of which except one are in Africa and Asia. Of these MMCs in Africa and Asia only twelve inhabited by about 165 million people have ever achieved a high score on the Human Development Index HDI the index that measures life expectancy at birth education and standard of living and ranks how developed a country is. This means that the majority of the world's Muslim population lives in poverty with low or medium level of human development. The contributions to this innovative volume attempt to determine why this is. They explore the influence of environment space and power on human development. The result is a complex interdisciplinary study of all MMCs in Africa and Asia. It offers new insights into the current state of the Muslim World and provides a theoretical framework for studying human development from an interdisciplinary social cultural economic environmental political and religious perspective which will be applicable to regional and cultural studies of space and power in other regions of the world. *The Geography of the World Economy 5th Edition* Paul Knox, John Agnew, Linda

McCarthy, 2014-04-04. The Geography of the World Economy provides an in depth and stimulating introduction to the globalization of the world economy. The book offers a consideration of local regional national and global economic development over the long historical term. The theory and practice of economic and political geography provide a basis for understanding the interactions within and among the developed and developing countries of the world. Illustrated in colour throughout this new edition has been completely reworked and updated to take account of the substantial changes in the world economy and includes a new chapter on services. It is ideal for upper level university undergraduates and for post graduates in a variety of specializations including geography economics political science international relations and global studies. **Modified Mastering Geography with Pearson Etext -- Standalone Access Card -- For World Regions in Global Context**
