Worldmark Maintenance Fees 2014:

Ports and Waterways Mark van Koningsveld, Henk Verheij, Poonam Taneja, Huib de Vriend, 2023-02-09 Before you lies the book *Ports and Waterways Navigating the changing world* written by the Ports and Waterways team part of the Civil Engineering and Geosciences faculty at Delft University of Technology It integrates the content of a number of separate lecture notes we used in our teaching activities and updates this information where relevant The integration reflects our vision that ports and waterways should be viewed as parts of a coherent system that supports waterborne supply chains and that their integral design and operation is essential

The Age of Sustainability Mark Swilling, 2019-11-06 With transitions to more sustainable ways of living already underway this book examines how we understand the underlying dynamics of the transitions that are unfolding Without this understanding we enter the future in a state of informed bewilderment Every day we are bombarded by reports about ecosystem breakdown social conflict economic stagnation and a crisis of identity There is mounting evidence that deeper transitions are underway that suggest we may be entering another period of great transformation equal in significance to the agricultural revolution some 13 000 years ago or the Industrial Revolution 250 years ago This book helps readers make sense of our global crisis and the dynamics of transition that could result in a shift from the industrial epoch that we live in now to a more sustainable and equitable age The global renewable energy transition that is already underway holds the key to the wider just transition However the evolutionary potential of the present also manifests in the mushrooming of ecocultures new urban visions sustainability oriented developmental states and new ways of learning and researching Shedding light on the highly complex challenge of a sustainable and just transition this book is essential reading for anyone concerned with establishing a more sustainable and equitable world Ultimately this is a book about hope but without easy answers

Engineering for Extremes Mark G. Stewart, David V. Rosowsky, 2021-12-16 The volume explains how risk and decision making analytics can be applied to the wicked problem of protecting infrastructure and society from extreme events There is increasing research that takes into account the risks associated with the timing and severity of extreme events in engineering to reduce the vulnerability or increase the resiliency of infrastructure Engineering for extremes is defined as measures taken to reduce the vulnerability or increase the resiliency of built infrastructure to climate change hurricanes storms floods earthquakes heat waves fires and malevolent and abnormal events that include terrorism gas explosions vehicle impact and vehicle overload The book introduces the key concepts needed to assess the economic and social well being risks costs and benefits of infrastructure to extreme events This includes hazard modelling likelihood and severity infrastructure vulnerability resilience or exposure likelihood and extent of damage social and economic loss models risk reduction from protective measures and decision theory cost benefit and utility analyses Case studies authored by experts from around the world describe the practical aspects of risk assessment when deciding on the most cost efficient measures to reduce infrastructure vulnerability to extreme events for housing buildings bridges roads
