Doobay-Persaud, Tracy L. Rabin, Tomlin Paul, Jessica Evert, Benedicta Ayiedu Mensah, 2024-10-01

Global Health a field of study research and practice defined in 2009 with precursors in international health and development is currently reckoning with itself The field has well intended goals emphasizing collaboration and dialogue between population health public health clinical care and other disciplines to address socioeconomic determinants of health and employing interdisciplinary approaches to address health inequities wherever they exist Despite these lofty ideals there are concerns that the field itself has historically served to reinforce rather than deconstruct colonialism and power imbalances At this point in time the field has evolved toward a vision of a community of practice between institutions across the income spectrum HIC LMIC LIC working in bidirectional and multidirectional ways to develop staff staff space systems and strategies to eliminate health disparities However with deeply rooted colonial assumptions racism elitism and other forms of bias underlying institutions and individuals initiatives operating under the auspices of Global Health are all too often antithetical to the pursuit itself      Understanding Climate Change through Religious Lifeworlds David L. Haberman, 2021-05-04 How can religion help to understand and contend with the challenges of climate change

Understanding Climate Change through Religious Lifeworld edited by David Haberman presents a unique collection of essays that detail how the effects of human related climate change are actively reshaping religious ideas and practices even as religious groups and communities endeavor to bring their traditions to bear on mounting climate challenges People of faith from the low lying islands of the South Pacific to the glacial regions of the Himalayas are influencing how their communities understand earthly problems and develop meaningful responses to them This collection focuses on a variety of different aspects of this critical interaction including the role of religion in ongoing debates about climate change religious sources of environmental knowledge and how this knowledge informs community responses to climate change and the ways that climate change is in turn driving religious change Understanding Climate Change through Religious Lifeworlds offers a transnational view of how religion reconciles the concepts of the global and the local and influences the challenges of climate change

**Myth and Philosophy** Frank E. Reynolds, David Tracy, 1990-10-30 The book as a whole seeks to reinvigorate an academic discipline philosophy of religion which has fallen on hard times and to do so by building a bridge between philosophy and empirical historical studies of religion The topic is both significant and timely Too long the empiricists have been inadequately sophisticated philosophically and too long the philosophers have ignored historical data both in its breadth and depth In not only calling for bridges between these disciplines but actually building some the work makes a significant

contribution to both Alan Miller This book is useful because it provides some insights both into the ways scholars think about various aspects of religious behavior and also information about important features of such behavior Both myth and philosophy are topics of great significance and have been discussed by many philosophers and historians of religions and some anthropologists An interesting set of questions about the nature of religion and nature of philosophy and their relationships and also about the nature of myth and its relationship to philosophy is emerging at the forefront of academic discussions in departments of religion departments of philosophy and departments of anthropology It contains some well written and conceptually interesting essays E Thomas Lawson      **The Social and Political Systems of Central Polynesia**

motifs Descent to the Underworld the Hero the Trickster Creation the Quest mythological figures Odysseus Zeus Osiris Spider Woman and Inanna as well as numerous interrelated subjects such as fairy tales and legends The Companion also locates myth in our lives today relating it to language patterns psychology religion politics art and gender attitudes Many of the better known and more significant myths are vividly retold in this volume that will be illustrated with maps more than 70 black and white images and eight pages of color highlighting the central role art has often played in the transmission and perpetuation of myth Following the entries a rich section of appendices will include family trees of the major pantheons equivalency charts for the gods of Greece and Rome Babylon and Sumer as well as other traditions an extensive bibliography and an index
