Victoria J. B. Okeyo-Owuor, 1999 **Progressive Traditions** Helen Parker, 2021-10-01 This monograph with an accompanying CD ROM explores through plot repetition the relationships between three genres of traditional Japanese theatre n kabuki and ningyō j ruri with a focus on plays depicting the final fugitive years of Minamoto no Yoshitsune First the theoretical background to the concept of plot repetition is discussed and the theme of Yoshitsune's downfall is introduced The next and main section analyses the treatment of the Funa Benkei and Ataka Kanjinch plots in the three genres with reference to their historical development and contemporary performance The CD ROM contains video clips photographs and nishiki e prints from productions in each genre to illustrate how the plots are presented on stage *The Confucian Creation of Heaven* Robert Eno, 1990-06-01 Demonstrating that the relation between practice and theory in early Confucianism is highly systematic the author suggests that Confucianism represents a species of synthetic philosophy distinct from the analytical traditions of the West but equally rigorous in its attempt to disclose the foundations of understanding He illustrates how theory served as an ancillary activity expressing ethical insights derived from the systematic structure of core ritual practice and legitimizing those insights in terms of teleological model of their efficacy in creating a divinely ordained political utopia The central agenda of the early Confucians is pictured as the preservation and promotion of ritual skills and the aesthetic social perspectives they generate Metaphysical and political theory serve as practical vehicles mediating between the skill based philosophy of the early Confucian community and the changing features of the intellectual social and political environments in which that community had to survive **The Wet and the Dry** Patrick Vinton Kirch, 1994 Scholars and researchers have long believed that the ability to irrigate is crucial to the development of civilizations In this book archaeologist Patrick Kirch challenges this hydraulic hypothesis and provides a more accurate and detailed account of the role of wet and dry cultivation systems in the development of complex sociopolitical structures Examining research on cultural adaptation and ecology in Western Polynesia and utilizing extensive data from a variety of important South Pacific

sites Kirch not only reveals how particular systems of production developed within the constraints imposed by environmental conditions but also explores the tension that arises between contrasting productive systems with differential abilities to produce surplus He shows that the near total neglect of short fallow dryland cultivation as well as arboriculture or tree cropping has seriously distorted the picture that archaeologists and anthropologists have of agricultural intensification and its relation to complex social structure This work likely to become a classic will be central to all future discussions of the ecology and politics of agricultural intensification *The Cellular Stress Response and Physiological Adaptations of Corals Subjected to Environmental Stressors and Pollutants* Davide Seveso, Craig Downs, Ranjeet Bhagooli, 2022-07-18
