Cold, Bent L. Dahl, 2013-11-11 The science of neuroanaesthesia and neurointensive care is fascinating and the amounts of experimental and clinical studies are overwhelming Surely everyone can surf Medline and other database systems in order to get information If you however ask for head injury cerebral ischaemia or barbiturate you will get hundreds may be thousands of titles and even the same number of abstracts The aims of this book are to review important experimental and clinical data with emphasis on up dated references The text within each issue and sub issue systematically covers experimental and clinical data separately and details concerning cerebral blood flow cerebral metabolism intracranial pressure etc are reviewed accordingly In our survey of the literature we did not use Medline or other database systems systematically Rather we used available medical journals which covered the topics of anaesthesia neuroanaesthesia and neurointensive care In this way we hope that relevant literature is presented On the other hand we cannot exclude that some important issues are omitted The book covers 12 topics In three chapters methodology of CBF measurements regulation of CBF and intracranial pressure are described In the next 6 chapters inhalation anaesthetics hypnotic agents analgesics muscular relaxants drugs used for control of blood pressure and the sitting position are reviewed The last three chapters cover head injury subarachnoid haemorrhage and cerebral ischaemia **Voices in the Wilderness** Walter Simmons, 2006-02-24 Despite the Modernist search for new and innovative aesthetics and rejection of traditional tonality several twentieth century composers have found their own voice while steadfastly relying on the aesthetics and techniques of Romanticism and 19th century composition principles Musicological and reference texts have regarded these composers as isolated exceptions to modern thoughts of composition_exceptions of little importance treated simplistically and superficially Music critic and scholar Walter Simmons however believes these composers and their works should be taken seriously They are worthy of more scholarly consideration and deserve proper analysis assessment and discussion in their own regard In Voices in the

Wilderness the first in a series of books celebrating the Twentieth Century Traditionalist Simmons looks at six Neo Romantic composers Ernest Bloch Howard Hanson Vittorio Giannini Paul Creston Samuel Barber Nicolas Flagello Through biographical overviews and a comprehensive assessment of musical works Simmons provides readers with a clear understanding of the significance of the composers their bodies of work and their placement in musicological history The chapters delve deeply and objectively into each composer s oeuvre addressing their origins stylistic traits and consistencies phases of development strengths and weaknesses and affinities with other composers The composers most representative works are identified and each chapter concludes with a discography of essential recordings Visit the author s website to read samples from the book and to listen to representative excerpts of each composer s work **The Great Sermon Tradition**

as a Fiscal Framework in 1 Corinthians Christopher L. Carter,2010-02-03 What is Paul s theology of material possessions and where did it come from Through demonstrating continuity in the broad fiscal thought of Jesus and Paul Carter suggests that Paul owes his financial thought to the great sermon tradition Carter establishes this by assessing Paul s historical environment and extant writings to display the plausibility that Paul knew the dominical tradition Carter goes on to assess the likelihood that Paul knew the pre synoptic sermon tradition because of its ubiquity in early church discipleship The study finishes with the conclusion that Jesus and Paul s financial thought displays remarkable symmetry which cannot be explained merely by a common cultural environment Consequently it is deemed highly likely that Paul depends on the dominical tradition for the contours of his financial thought **Catalog of Copyright Entries. Happe,2013-05-06 In 2000 the National Human Genome Research Institute announced the completion of a draft of the human genome the sequence information of nearly all 3 billion base pairs of DNA In the wake of this major scientific accomplishment the focus on the genetic basis of disease has sparked many controversies as questions are raised about radical preventative therapies the role of race in research and the environmental origins of illness In The Material Gene Kelly Happe explores the cultural and social dimensions of our understandings of

genomics using this emerging field to examine the physical manifestation of social relations Situating contemporary genomics medicine and public health within a wider history of eugenics Happe examines how the relationship between heredity and dominant social and economic interests has shifted along with transformations in gender and racial politics social movement and political economy Happe demonstrates that genomics is a type of social knowledge relying on cultural values to attach meaning to the body The Material Gene situates contemporary genomics within a history of genetics research yet is attentive to the new ways in which knowledge claims about heredity race and gender emerge and are articulated to present day social and political agendas Kelly E Happe is assistant professor of communication studies and women s studies at the University of Georgia
