**Refractory Engineering and Kiln Maintenance in Cement Plants** J.P. Saxena, 2003-01-01 This book deals with two important areas that directly affect kiln availability for production These two aspects decide if the cement plant would make profit or loss during the year At the moment there is no book that deals with these aspects The literature on these subjects is scattered and the totality of the subject is missing The book *Refractory Engineering and Kiln Maintenance in Cement Plants* is an utmost requirement for the Cement Industry and would fulfil the needs of the Cement Industry all over the world It has brought out various developments of refractory with the changing technological scenario The contents is totally comprehensive in every respect and has been planned in such a way that starting from Changing Phases of Kiln Systems and Choice of Refractories Improving the Kiln Up time there are also important chapters on Inspection Storage and Packing of Refractories Refractory Management Kiln Maintenance with a bonus of a glossary of the technical terms The book will serve as a handbook for production managers production engineers Kiln operators refractory engineers maintenance managers purchase engineers inventory engineers warehouse officers and storekeepers

**Technologies and Management Strategies for Hazardous Waste Control** United States. Congress. Office of Technology Assessment, 1983 *Waste Reduction for Pollution Prevention* P. N. Cheremisinoff, L. M. Ferrante, 2013-10-22 Waste Reduction for Pollution Prevention discusses the philosophy regulatory background and technical options dealing with waste minimization The book explains waste reduction as a form of pollution prevention to minimize the amount of hazardous materials dumped into the environment The 1984 Resource Conservation and Recovery Act amendments restrict the amount of waste that can be disposed on land The approach of the United States is to address pollution after the problem has been created where attention and resources of industry shift to regulatory compliance The text notes that waste reduction is the key to preventing future hazardous waste problems Examples of techniques of waste minimization are good housekeeping changes in technology and procedures raw material substitution recycling and waste exchanges The book discusses the biological thermal and other emerging thermal processes for industrial waste management as well as municipal solid waste recycling and the organization of a recycling program The

text can benefit economists environmentalists urban developers and policy makers involved in waste management community preservation and development

**Rotary Kilns** Akwasi A. Boateng, 2015-11-13 Rotary Kilns rotating industrial drying ovens are used for a wide variety of applications including processing raw minerals and feedstocks as well as heat treating hazardous wastes They are particularly critical in the manufacture of Portland cement Their design and operation is critical to their efficient usage which if done incorrectly can result in improperly treated materials and excessive high fuel costs This professional reference book will be the first comprehensive book in many years that treats all engineering aspects of rotary kilns including a thorough grounding in the thermal and fluid principles involved in their operation as well as how to properly design an engineering process that uses rotary kilns This new edition contains an updated CFD section with inclusion of recent case studies and in line with recent developments covers pyrolysis processes torrefaction of biomass application of rotary kilns in CO<sub>2</sub> capture and information on using rotary kilns as incinerators for hydrocarbons Provides essential information on fluid flow granular flow mixing and segregation and aerodynamics during turbulent mixing and recirculation Gives guidance on which fuels to choose including options such as natural gas versus coal fired rotary kilns Covers principles of combustion and flame control heat transfer and heating and material balances New edition contains information on pyrolysis processes with low temperatures and torrefaction of biomass It also covers calcination of petcoke how rotary kilns are used as incinerators for chlorinated hydrocarbons Includes updated material on CFD simulation of kiln gas and solids flow with a selection of recent case studies

**Hazardous Waste Incineration and Human Health** Curtis C. Travis, S. Chrystal Cook, 1989-03-31 This informative publication provides an introduction to the public health implications of hazardous waste incineration The complexities involved in defining measuring and regulating the nation's hazardous waste are discussed as well as brief descriptions of the hazardous waste incineration process Summaries of the data base for the incinerator test burns conducted by or for the Environmental Protection Agency EPA are presented along with a description of the four components of risk analysis sample calculations of both carcinogenic and noncarcinogenic health risk estimates and the predictive methodology employed in quantitative risk assessment for hazardous waste incinerators Also discussed are the risk estimates for exposure to hazardous waste incinerator emissions inhalation exposure to incinerator stack releases of heavy metals and to polychlorinated biphenyl compounds and ingestion exposure to incinerated releases through the terrestrial food chain This book will be of interest to local regulatory officials incineration facility operators researchers in the hazardous waste areas and concerned citizens

**Concrete in the Service of Mankind** Ravindra Dhir, Thomas Dyer, 1996-06-13 Concrete is ubiquitous and unique found in every developed and developing country Indeed there are no alternatives to concrete as a volume construction material for infrastructure This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term and to encourage further radical development Equally it must be environmentally friendly during manufacture in an aesthetic presentation in structures and

in the containment of harmful materials The central theme of the Congress is Concrete in the Service of Mankind under which five self contained Conferences each dealing with a particular aspect are planned The Congress offers opportunity to discuss how to improve and extend this service to mankind using responsible exploitation underwritten by sound technical understanding and research base It brings together the shared skills and experience of the various disciplines involved in the construction process world wide This major publication continues the tradition established by Dundee University of organizing major international conferences every three years dealing with some aspect of concrete and also the link between Spon and Dundee University for publication of the proceedings This book should be of interest to concrete technologists contractors civil engineers consultants government agencies research organizations China's Technological Catch-Up Strategy Michael T. Rock, Michael Toman, 2015-02-09 Prior to 1979 China had a bifurcated and geographically dispersed industrial structure made up of a relatively small number of large scale state owned enterprises in various industries alongside numerous small scale energy intensive and polluting enterprises Economic reforms beginning in 1979 led to the rapid expansion of these small scale manufacturing enterprises in numerous energy intensive industries such as aluminum cement iron and steel and pulp and paper Subsequently the government adopted a new industrial development strategy labeled grasp the large let go the small The aims of this new policy were to close many of the unprofitable small scale manufacturing plants in these and other industries create a small number of large enterprises that could compete with OECD multinationals entice these larger enterprises to engage in high speed technological catch up and save energy China's Technological Catch Up Strategy traces the impact of this new industrial development strategy on technological catch up energy use and CO2 emissions In doing so the authors explore several detailed enterprise level case studies of technological catch up develop industry wide estimates of energy and CO2 savings from specific catch up interventions and present detailed econometric work on the determinants of energy intensity The authors conclude that China's strategy has contributed to substantial energy and CO2 savings but it has not led to either a peaking of or a decline in CO2 emissions in these industries More work is needed to cap and reduce China's CO2 emissions *Mineral Trade Notes* United States. Bureau of Mines, 1948 **Refractories for the Chemical Industries** Prasunjit Sengupta, 2020-11-28 The book provides process engineers an insight into refractories focusing on its importance and requirements in chemical process industries such as refinery and petrochemicals syngas manufacturing coal gasification limestone calcinations carbon black glass and cement production Additionally the book discusses the refractory requirements for the CFBC boiler and waste heat utilization process to generate steam The book describes characterization of refractory material and selection process of the refractory for lining different equipments pertaining to the chemical process industry The book covers refractory installation techniques and the precautions to be taken during installation are discussed in detail along with the theoretical background It explains the physical and chemical factors that influence the performances of refractory mechanism of its degradation in service and

emphasizes on the thermo chemical and thermo mechanical aspects and their role in that process The content lays out different methods of monitoring Refractory lining conditions while the furnace is in operation and also elucidates few methods to repair the worn out lining without taking a shutdown The scheme of investigation of a refractory failure is an added feature      **Metallurgical & Chemical Engineering** Eugene Franz Roeber,Howard Coon Parmelee,1918      *Beyond Superfailure* Daniel Mazmanian,2019-03-04 Despite numerous small success stories the big picture of America s toxics programs is one of overall failure Superfund has failed to Clean up America s worst dump sites policies to regulate generation of new hazardous waste have foundered standards have been set for only eight of several hundred air toxics transportation spills and industrial      **N.A.P.C.A.
