

Rotax Service Interval Guide

Not new news, but a very informative summary

With growing numbers of 912 & 914 series engines in service these days Rotax have gathered a great deal of field experience and have been continually updating the maintenance procedures. Operators of 912 & 914 series engines can obtain current maintenance manuals free of charge, (yep I did say FREE) from the Rotax aircraft engines web site www.rotax-aircraft-engines.com – just click on the documentation tab & fill in the relevant search boxes to obtain the documents you require. You will find parts lists, line & heavy maintenance manuals, service bulletins, operator's manuals, installation manuals, and a whole host of information you may not have known about. The system is not perfect, for example parts lists for early engines are not available, but it is pretty good & full of useful documentation.

We do find that some Rotax owners find the documentation difficult to interpret and occasionally miss things - agreed it can be difficult to see the wood through the trees, especially after translation. As the maintenance & overhaul information has changed over the last couple of years it's probably a good time to have a recap on how things are now.

So before the flying season gets too busy why not take the opportunity to make sure your engine is ready for the new flying season – I'm assured its going to be a good one this year!

Figure 1: Documentation page of the Rotax Aircraft Engines website (www.rotax-aircraft-engines.com)

MAINTENANCE SCHEDULES

The alterations to the maintenance schedules over the years have mainly been to reduce the work required and the parts replaced, so should you want to save a few pennies in these difficult times you better read on. Now is the time to make sure that you are doing all the necessary checks and have the up to date information. If you are doing your own maintenance it is worthwhile printing out the section in the line maintenance manual detailing each procedure and using it as your worksheet. The gist of that section is summarised below but it will vary, especially if you are using Avgas, or have certain components fitted, so make sure you follow it carefully. For those wishing to have a go at maintaining their own engine, a handy guide can be found on the downloads page our website at www.conairsports.co.uk. Please bear in mind that anyone working on aircraft
