It covers key technological issues such as hacking, cyber crime, cyber security and cyber warfare, the internet, smart phones, electronic security and information privacy. This book traces the rise into prominence of these issues while also exploring the resulting cultural reaction. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first-year economics ask themselves are: Why am I here? and Will I ever use this? Hubbard's *Essentials of Economics* answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the chapter and concludes with an 'Inside Look', a news article format which illustrates how a key principle covered in the chapter relates to real business situations or was used by a real company to make a real business decision.
