language view of semantics can be incorporated into the action based view and that this can lead to important improvements in both intuitive understanding and empirical coverage This enterprise uses types rather than possible worlds as commonly employed in studies of the semantics of natural language Types are more tractable than possible worlds and offer greater potential for understanding the implementation of semantics both on machines and in biological brains Quarterly Journal of the Royal Meteorological Society Royal Meteorological Society (Great Britain),1904 Vols 10 11 include Meteorology of England by James Glaisher as separately paged section at end
