

# Template Position Paper

As described in the cover memo, a group of CMER members has been working for over a year in response to TFW Policy's motion to review the Washington Farm Forestry Association (WFFA)-sponsored SFLO Template Scientific Justification (SJ) and supporting documents (See attached CMER cover memo). CMER was given three documents by Policy, including the SJ, a review of this document by Mark Teply of Cramer Sciences (hereafter, Teply review), and an ISPR assessment of the Teply review (hereafter, ISPR review). The group made a good faith effort to come to a mutually acceptable agreement on the scientific merits, assessment and interpretation of information provided by the SJ, the Teply review of the SJ, and the ISPR review of the Teply review. Despite these efforts, we could not agree on many of the substantive issues.

CMER members were not able to come to consensus on how to use the information in the Teply review to answer questions 4a and 4b in the CMER Answers to 6 Questions document. Group members found that the Teply review contained contradictory information, and it was not clear to some group members the extent to which ISPR comments addressed the science in the SJ or in Teply's review of that science. There was no opportunity for group members to discuss these issues with Teply or with the ISPR reviewers, and ultimately the full group was not able to come to agreement on how to interpret the various findings. As a result, CMER members found it difficult to engage in substantive discussions on the technical merits of the SFLO prescriptions based on Teply's review of those prescriptions. Additional attempts to come to a mutual agreement about an overall understanding of the context and utility of the information provided were also unsuccessful. Ultimately, these factors prevented resolution of disagreements regarding what the SJ and supporting documents told us and did not tell us about the proposed SFLO riparian buffer prescriptions.

The following is a summary of the large-scale issues that were seen by the CMER participants listed above as obstacles to consensus regarding a technical summary of the information. These include issues with the (1) type of documents provided, (2) the uncertainty of assessments within the SJ, (3) the scope of inference needed to reach a defensible conclusion, and (4) the role that newer data might have played if it had been used to update the document during the seven years since the SFLO Template Proposal was originally submitted to Policy for review.

## Documents

The SJ was written based on a limited literature review and contained an un-validated, modeled analysis of shade. Neither un-validated models nor limited literature reviews meet the scientific merits for considering non-CMER science in the AMP (Use of Non-CMER Science in the Forest Practices Adaptive Management Program, 2013).

The SFLO template proposal did not follow CMER's project development, literature review, scoping, best available science, alternatives analysis or QA/QC process outlined in the CMER Protocols and Standards Manual and referenced in DNR's adaptive management board manual (Section 22). Additionally, the author never revised his report in response to the Teply review.

**Advanced Manufacturing and Automation XIII** Yi Wang,Tao Yu,Kesheng Wang,2024-02-24 The book is a compilation of selected papers from the 13th International Workshop of Advanced Manufacturing and Automation IWAMA 2023 held in Shanghai University of Engineering Science China on 15 16 October 2023 Topics focusing on novel techniques for manufacturing and automation in Industry 4 0 are now vital factors for the maintenance and improvement of the economy of a nation and the quality of life It will help academic researchers and engineers to implement the concept theory and methods in Industry 4 0 which has been a hot topic These proceedings will make valuable contributions to academic researchers engineers in the industry for the challenges in the 4th industry revolution and smart factories

The Principle

of Proportionality, Solvency II and Captives Marta Ostrowska, 2025-03-05 This book offers an in depth analysis of the principle of proportionality in the EU insurance regulatory regime It takes a critical look at how proportionality has been implemented in Solvency II and tests its effectiveness on captive re insurance undertakings Given their unique business model captives are considered the primary beneficiary of proportionality and therefore offer the perfect litmus test for the principle s effectiveness In a world characterized by overregulation and increasingly complex financial markets governments and policymakers face the challenge of regulating markets without hindering their growth As one size fits all approaches have long since been recognized as detrimental the EU is seeking to develop a regulatory technique which allows more individual regulatory treatment while ensuring a level playing field The first revolutionary step towards this goal was taken in Solvency II Directive 2009/138/EC which introduced a principle of proportionality to the EU insurance market The principle is a unique tool which makes it possible to adjust the requirements of the Solvency II framework to the nature scale and complexity of each individual insurance undertaking s risk profile It is intended to help remove an unnecessary regulatory burden for insurance undertakings and to prevent the proliferation of regulations in general However the practical implementation of proportionality is not without its share of obstacles The principle s generic nature and the lack of guidance have caused a great deal of confusion regarding its practical application and prevented insurance undertakings from using its benefits to the fullest Consequently the principle of proportionality has been subject to revision within the first Solvency II review process The book will benefit captive owners captive managers regulators supervisors practitioners academics students and more generally all those involved with or interested in the insurance market      *Grammaticalization Scenarios from Europe and Asia* Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire      *Mechanics*, 1882      **Engineering Mechanics Devoted to Mechanical Civil, Mining and Electrical Engineering**, 1882      **Engineering Mechanics**, 1882
