

Reflection and Planning

This section supports early learning and child care educators in their reflection and planning processes. The reflection and planning guide assumes a strong, capable image of the child and family, described in the previous documents, *The Image of the Child: A Mighty Learner and Citizen and A Practice of Relationships: Your Role as an Early Learning and Child Care Educator*. Within the Alberta curriculum framework, content begins with the experiences of children and engages educators as co-learners, co-researchers and co-imagers of possibilities. In these roles, educators are encouraged to make use of a co-inquiry process¹ and emergent curriculum² planning in ways that notice and name what children are doing in their play, learning and development; reflect and interpret using the curriculum goals and children's dispositions to learn; and then, co-imagine possibilities with children, families and colleagues for further exploration and play. The physical and responsive environment—including time, space, materials, and participation—changes to reflect how educators make meaning of the curriculum that children are already engaged in through this emergent and reflective process.

The Business of Child Care 5e Karen Kearns, 2021-08-05 This text has been substantially revised to include a broader range of knowledge and practice necessary for the challenging role of leading and managing children's education and care services. The provision of quality early childhood education and care requires knowledgeable leaders and managers who possess a range of twenty-first century workplace skills necessary to guide the organisation through a process of continuous improvement to meet the increasing demands of service delivery. To address learning needs, this text now includes knowledge related not only to the Children's Services training package but also to the Business Services training package. In particular, knowledge content related to a number of competencies from the Diploma of Leadership and Management has been added. In practical terms, *The Business of Child Care* can be used as a textbook for students completing their initial children's services diploma training and for experienced educators seeking to develop leadership and management skills by undertaking a Diploma of Leadership and Management. Additional content includes emotional intelligence, risk management as a continuous improvement tool, workplace wellbeing, the need for which became very evident with the stress of the pandemic, critical thinking skills essential for evaluating service delivery and engaging in self-reflection. Communication has been closely examined so that having difficult conversations, influencing and persuading others, supporting conflict resolution and guiding meetings to ensure that all team members are supported to have a voice in the organisation are addressed.
