*Structural Foundation Designers' Manual* W. G. Curtin, Gerry Shaw, Gary Parkinson, J. Golding, Norman Seward, 2006-12-04 This manual for civil and structural engineers aims to simplify as much as possible a complex subject which is often treated too theoretically by explaining in a practical way how to provide uncomplicated buildable and economical foundations It explains simply clearly and with numerous worked examples how economic foundation design is achieved It deals with both straightforward and difficult sites following the process through site investigation foundation selection and finally design The book includes chapters on many aspects of foundation engineering that most other books avoid including filled and contaminated sites mining and other man made conditions features a step by step procedure for the design of lightweight and flexible rafts to fill the gap in guidance in this much neglected yet extremely economical foundation solution concentrates on foundations for building structures rather than the larger civil engineering foundations includes many innovative and economic solutions developed and used by the authors practice but not often covered in other publications provides an extensive series of appendices as a valuable reference source For the Second

Edition the chapter on contaminated and derelict sites has been updated to take account of the latest guidelines on the subject including BS 10175 Elsewhere throughout the book references have been updated to take account of the latest technical publications and relevant British Standards

**Deep Excavations** Malcolm Puller, 2003 This book assembles the practical rules and details for the efficient and economical execution of deep excavations It draws together a wealth of experience of both design and construction from published work and the lifetime practice of the author This second edition is extensively revised to include changes in design emphasis including those due to Eurocode 7 and descriptions of the latest equipment construction techniques and geotechnical processes Additional details include those of the latest piling and diaphragm wall equipment and innovations in top down construction applied to basements and cut and cover works The section on caissons has been expanded to include design methods
