L2 Reading in English for Academic Purposes Cyril Weir, Yang Huizhong, Jin Yan, 2000-12-07 This volume reports on the development of the Advanced English Reading Test in China *The Meaning of "Make Disciples" in the Broader Context of the Gospel of Matthew* Lindsay D. Arthur, 2022-05-09 Students of the Bible are generally comfortable with their understanding of the command make disciples Matt 28 19 Indeed most of them would argue that the Gospel writer Matthew spells out very clearly the meaning of the term in the Great Commission Matt 28 16 20 by utilizing three key words viz go ing baptizing and teaching This point of view is the result of centuries of scholarly opinion that has looked primarily if not solely

to these three adjacent participles of make disciples Matt 28 19 and not to the entire Gospel of Matthew for the meaning of the command This book does not suggest that going baptizing and teaching are not to be considered in determining the essence of Christian disciple making Rather it contends that the three terms should not be our only source of meaning This problem is tackled herein by demonstrating that Matthew establishes a framework within the Great Commission itself that points to a fuller meaning of make disciples in the broader context of his Gospel and that the Gospel writer expects his reader to draw on his entire Gospel to grasp the full meaning of this important command Keter Arthur Green,2014-07-14 Keter is a close reading of fifty relatively brief Jewish texts tracing the motif of divine coronation from Jewish esoteric writings of late antiquity to the Zohar written in thirteenth century Spain In the course of this investigation Arthur Green draws a wide arc including Talmudic Midrashic liturgical Merkavah German Hasidic and Kabbalistic works showing through this single theme the spectrum of devotional mystical and magical views held by various circles of Jews over the course of a millennium or more The first portion of the work deals with late antiquity emphasizing the close relationship between texts of what is often depicted as normative Judaism and their mystical magical analogues The mythic imagination of ancient Judaism he suggests is shared across this spectrum The latter portion of the work turns to the medieval Jews who inherited this ancient tradition and its evolution into Kabbalah where keter plays a key role as the first of the ten divine emanations or sefirot The nature of these sefirot as symbols and the emergence of a structured and hierarchical symbolism out of the mythic imagery of the past are key themes in these later chapters As a whole Keter takes the reader on an exciting tour of the interior landscapes of the Jewish imagination offering some remarkable insights into the nature of mystical and symbolic thinking in the Jewish tradition Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Computations and Computing**

Devices in Mathematics Education Before the Advent of Electronic Calculators Alexei Volkov,Viktor Freiman,2019-01-11 This volume traces back the history of interaction between the computational or algorithmic aspects of elementary mathematics and mathematics education throughout ages More specifically the examples of mathematical practices analyzed by the historians of mathematics and mathematics education who authored the chapters in the present collection show that the development and in some cases decline of counting devices and related computational practices needs to be considered within a particular context to which they arguably belonged namely the context of mathematics instruction in their contributions the authors also explore the role that the instruments played in formation of didactical approaches in various mathematical traditions stretching from Ancient Mesopotamia to the 20th century Europe and North
