Testing, Teaching, and Learning National Research Council, Division of

Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on Title I Testing and Assessment, 1999-10-06 State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education which provides aid to level the field for disadvantaged students. *Testing Teaching and Learning* is written to help states and school districts comply with the new law offering guidance for designing and implementing assessment and accountability systems. This book examines standards based education reform and reviews the research on student assessment focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems the committee develops a practical decision framework for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. *Testing Teaching and Learning* will be an important tool for all involved in educating disadvantaged students: state and local administrators and classroom teachers.
