sites Kirch not only reveals how particular systems of production developed within the constraints imposed by environmental conditions but also explores the tension that arises between contrasting productive systems with differential abilities to produce surplus He shows that the near total neglect of short fallow dryland cultivation as well as arboriculture or tree cropping has seriously distorted the picture that archaeologists and anthropologists have of agricultural intensification and its relation to complex social structure This work likely to become a classic will be central to all future discussions of the ecology and politics of agricultural intensification The Cellular Stress Response and Physiological Adaptations of Corals Subjected to Environmental Stressors and Pollutants Davide Seveso, Craig Downs, Ranjeet Bhagooli, 2022-07-18
