Day,Michael Elliott,Ramachandran Ramesh,2019-01-24 Coasts and Estuaries The Future provides valuable information on
how we can protect and maintain natural ecological structures while also allowing estuaries to deliver services that produce
societal goods and benefits These issues are addressed through chapters detailing case studies from estuaries and coastal
waters worldwide presenting a full range of natural variability and human pressures Following this a series of chapters
written by scientific leaders worldwide synthesizes the problems and offers solutions for specific issues graded within the
framework of the socio economic environmental mosaic These include fisheries climate change coastal megacities evolving
human nature interactions remediation measures and integrated coastal management The problems faced by half of the
world living near coasts are truly a worldwide challenge as well as an opportunity for scientists to study commonalities and
differences and provide solutions This book is centered around the proposed DAPSI W R M framework where drivers of basic
human needs requires activities that each produce pressures The pressures are mechanisms of state change on the natural
system and Impacts on societal welfare including well being These problems then require responses which are the solutions
relating to governance socio economic and cultural measures Scharin et al 2016 Covers estuaries and coastal seas worldwide
integrating their commonality differences and solutions for sustainability Includes global case studies from leading
worldwide contributors with accompanying boxes highlighting a synopsis about a particular estuary and coastal sea making
all information easy to find Presents full color images to aid the reader in a better understanding of details of each case study
Provides a multi disciplinary approach linking biology physics climate and social sciences **The Mining World** ,1908
