

As you approach a roundabout, slow down to the advisory speed and prepare to stop if necessary.

## 2 Choose the proper lane

If you're approaching a multi-lane roundabout, enter the appropriate lane well in advance of the intersection. Follow the signs showing which lanes can be used for different turns. For example, the sign beside this text means that:

- Right turns must use the right lane.
- Left turns must use the left lane.
- Drivers going straight through may use either lane.

If you're approaching a single-lane roundabout, you may only enter the single lane and must follow all signs.

## 3 Stop for pedestrians

Just before you reach the roundabout, look for any pedestrians in the crosswalk. Never block the crosswalk.

## 4 Yield to traffic

## 7 Stop for pedestrians

Watch for pedestrians as you exit the roundabout and stop for any pedestrians crossing.

Authors are experts from research industry and universities coming from around the world. The papers are covering the latest developments in automotive vehicles and environment, advanced transport systems and road traffic, advanced powertrain systems, new materials, manufacturing technologies, and logistics, accident research and analysis, and innovative solutions for automotive vehicles. The congress is organized by SIAR, Society of Automotive Engineers from Romania, in cooperation with SAE International and Transilvania University of Brasov. This third volume presents the papers on Advanced Transport Systems, Accident Research and Analysis, and some related to History of Automotive Technics and Technology.

*Sustainable Development and Planning V*. C. A. Brebbia, Elias Beriatos, 2011. This book contains the proceedings of the latest in a series of biennial conferences on the topic of sustainable regional development that began in 2003. Organised by the Wessex Institute of Technology, the conference series provides a common forum for all scientists specialising in the range of subjects included within sustainable development and planning. It has become apparent that planners, environmentalists, architects, engineers, policy makers, and economists have to work together in order to ensure that planning and development can meet our present needs without compromising the ability of future generations. The topics covered by the papers included in the book include City planning, Regional planning, Social and political issues, Sustainability in the built environment, Rural developments, Cultural heritage, Transportation, Ecosystems, analysis, protection, and remediation, Environmental management, Environmental impact assessment, Indicators of sustainability, Sustainable solutions in developing countries, Sustainable tourism, Waste management, Flood risk management, Resources management, and Industrial developments.
