Rover Group is a compelling insider's account of one of the most controversial periods in the British motor industry. The book covers the beginnings of Rover and its place in British Leyland, Land Rover's expansion in the 1980s and how it led to the foundation of the Rover Group, Rover under British Aerospace and the sell off to BMW, Rover's struggle under German management and BMW's disposal of the Group and finally the aftermath of Rover's collapse. MG, Rover, Land Rover and MINI. Fully illustrated with 270 historical and original colour photographs.

In 1968 British Leyland brought together many of Britain's motor manufacturers with the intention of creating a robust unified group that could equal the strength of the big European conglomerates. But this was not to be. There have been many books about the politics and the business activities of British Leyland, but *British Leyland The Cars 1968-1986* looks exclusively at the cars that came from the company, both the models it inherited and those it created. The eighteen years of the corporation's existence saw a confusing multitude of different car types, but this book resolves these confusions, clarifying who built what and when. The book takes 1986 as its cut off point because this was the year that the old British Leyland ceased to exist and what was left of the car and light commercial business was renamed the Rover Group. The book includes production histories and technical specifications of every major model. The special overseas models. Appendices on engines, code names and factories. Buying guidance on the models built in Britain. This is the most comprehensive book so far to focus on the cars from British Leyland between 1968-1986 and it provides an overview of each model's production history together with essential specification details. It is profusely illustrated with 178 colour and 63 b/w photographs.
