**Conditioning** R. Haines, 2012-12-06 There are two reasons why we have a new edition every four or five years The first is  
that technology changes Chapter 10 on computer based con trols has had to be almost completely rewritten Fundamentals  
don t change but the tools available to us do change Evaluation and proper use of those tools makes it even more imperative  
that we understand fundamentals Many of our control problems stem from the use of new devices as a solution to problems  
that are in fact control design errors New gadgets for example Direct Digital Controls DDC will not solve basic problems and  
may even compound them None the less you will find an extensive discussion of DDC because I think it is the probable future  
in HVAC control But it must be applied with a good understanding of fundamentals The second reason is that I keep learning  
and need to pass on my new and improved understanding to my readers Thus you will find a number of small but important  
revisions a dissertation on control modes and a much more detailed discussion of how electronic control devices work There  
are a few places where I have corrected what I now perceive to be errors I apologize for these I have been much encouraged  
by the acceptance of this book in the past and I hope that this new edition will be helpful Thank you for your support
