*Focus on Environmental Research* Emma B. Davis,2006 The environment is considered the surroundings in which an organism operates including air water land natural resources flora fauna humans

and their interrelation It is this environment which is both so valuable on the one hand and so endangered on the other And it is people which are by and large ruining the environment both for themselves and for all other organisms This book reviews the latest research in this field which is vital for everyone      **The Sinus Node** F.I. Bonke,2012-12-06 For the clinician the sinus node is more or less a hidden structure and only by indirect assessment he is able to say something about the function of this center of pacemaker activity The morphologist however is able to describe the structural microscopic and even electronmicroscopic features of this structure The only disadvantage is that as soon as he is coming into the picture the tissue is dead The physiologist tries to investigate the electrophysiological behavior of the sinus node Since there is not a human being willing to give his sinus node for research he has to do his investigation on isolated preparations of animals Though there are a lot of experts in the field of the sinus node they nearly never speak the same language Therefore it was my dream to bring all those people or at least some of them together on a workshop I had the feeling that it was important to organize such a meeting without an audience but only with experts      **The Cumulative Book Index** ,1902      **Research in Education** ,1973      **The Standard Periodical Directory** ,1993
