Churchill's Bomb Graham Farmelo,2013-10-08 Perhaps no scientific development has shaped the course of modern history as much as the harnessing of nuclear energy Yet the twentieth century might have turned out differently had greater influence over this technology been exercised by Great Britain whose scientists were at the forefront of research into nuclear weapons at the beginning of World War II As award winning biographer and science writer Graham Farmelo describes in Churchill s Bomb the British set out to investigate the possibility of building nuclear weapons before their American colleagues But when scientists in Britain first discovered a way to build an atomic bomb Prime Minister Winston Churchill did not make the most of his country s lead and was slow to realize the Bomb s strategic implications This was odd he prided himself on recognizing the military potential of new science and in the 1920s and 1930s had repeatedly pointed out that nuclear weapons would likely be developed soon In developing the Bomb however he marginalized some of his country s most brilliant scientists choosing to rely mainly on the counsel of his friend Frederick Lindemann an Oxford physicist with often wayward judgment Churchill also failed to capitalize on Franklin Roosevelt s generous offer to work jointly on the Bomb and ultimately ceded Britain s initiative to the Americans whose successful development and deployment of the Bomb placed the United States in a position

of supreme power at the dawn of the nuclear age After the war President Truman and his administration refused to acknowledge a secret cooperation agreement forged by Churchill and Roosevelt and froze Britain out of nuclear development leaving Britain to make its own way Dismayed Churchill worked to restore the relationship Churchill came to be terrified by the possibility of thermonuclear war and emerged as a pioneer of detente in the early stages of the Cold War Contrasting Churchill's often inattentive leadership with Franklin Roosevelt's decisiveness Churchill's Bomb reveals the secret history of the weapon that transformed modern geopolitics

Eric McDaniel NPR Joe Spring Smithsonian E Katherine E Himes Science The Analysis, Communication, and Perception of Risk B.John Garrick,Willard C. Gekler,2013-11-11 The 1989 Annual Meeting of the Society for Risk Analysis dramatically demonstrated one of the most important reasons for having the Society to bring together people with highly diverse backgrounds and disciplines to assess the common problems of societal and individual risks The physical scientists emphasized the analytical tools for assessing environmental effects and for modeling risks from engineered systems and other human activities The health scientists presented numerous methods of analyzing health effects including the subject of dose response relationships especially at low exposure levels never an easy analysis The social and political scientists concentrated on issues of risk perception communication acceptability and human touch Others discussed such issues as cost benefit analysis and the risk based approach to decision analysis Use of risk assessment methods for risk management continued to be a matter of strong opinion and debate The impacts of state and federal regulations existing and planned were assessed in sessions and in luncheon speeches These impacts show that risk analysis practitioners will have an increasingly important role in the future They will be challenged to provide clear easily understood evaluations of risk that are responsive to society's concern for risk as evidenced in laws and regulations Of course the various risk analysis specialties overlapped in domains of interest
