Inside a Modern Macroeconometric Model Alan A. Powell, Christopher W. Murphy, 2012-12-06 As Ken Wallis 1993 has pointed out all macroeconomic forecasters and policy analysts use economic models That is they have a way of going from assumptions about macroeconomic policy and the international environment to a prediction of the likely future state of the economy Some people do this in their heads Increasingly though forecasting and policy analysis is based on a formal explicit model represented by a set of mathematical equations and solved by computer This provides a framework for handling in a consistent and systematic manner the ever increasing amounts of relevant information Macroeconometric modelling though is an inexact science A manageable model must focus only on the major driving forces in a complex economy made up of millions of households and firms International economic agencies such as the IMF and OECD and most treasuries and central banks in western countries use macroeconomic models in their forecasting and policy analysis Models are also used for teaching and research in universities as well as for commercial forecasting in the private sector
