REVISION 2021

TERM 3 & 4

This revision program is designed to assist you in revising the critical content and skills covered during Terms 3 and 4. The purpose is to prepare you to understand the key concepts and to provide you with an opportunity to establish the required standard and the application of the knowledge necessary to succeed in the GRADE 11 examination. The content in this revision booklet is mostly presented by means of mind maps. This will help you to understand the content easier and also see the relationship between the topics. In most cases, content is integrated with mapwork. This revision booklet should be used in conjunction with the lessons of term 3 and 4.

The Physical Geography and Geology of the Driftless Area Eric C. Carson, J. Elmo Rawling III, J. Michael Daniels, John W. Attig, 2019-11-04 Over the course of his 43 year career James C Knox conducted seminal research on the geomorphology of the Driftless Area of southwestern Wisconsin His research covered wide ranging topics such as long term land scape evolution in the Driftless Area responses of floods to climate change since the last glaciation processes and timing of floodplain sediment deposition on both small streams and on the Mississippi River impacts of European settlement on the landscape and responses of stream systems to land use changes This volume presents the state of knowledge of the physical geography and geology of this unglaciated region in the otherwise glaciated Midwest with contributions written by Knox prior to his passing in 2012 and by a number of his former colleagues and graduate students A University Education David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework Geocryology Stuart A. Harris, Anatoli Brouchkov, Cheng Guodong, 2017-09-28 This book provides a general survey of Geocryology which is the study of frozen ground called permafrost Frozen ground is the product of cold climates as well as a variety of environmental factors Its major characteristic is the accumulation of large quantities of ice which may exceed 90% by volume Soil water changing to ice results in ground heaving while thawing of this ice produces ground subsidence often accompanied by soil flowage Permafrost is very susceptible to changes in weather and climate as well as to

changes in the microenvironment Cold weather produces contraction of the ground resulting in cracking of the soil as well as breakup of concrete rock etc Thus permafrost regions have unique landforms and processes not found in warmer lands The book is divided into three parts Part 1 provides an introduction to the characteristics of permafrost Four chapters deal with its definition and characteristics the unique processes operating there the factors affecting it and its general distribution Part 2 consists of seven chapters describing the characteristic landforms unique to these areas and the processes involved in their formation Part 3 discusses the special problems encountered by engineers in construction projects including settlements roads and railways the oil and gas industry mining and the agricultural and forest industries The three authors represent three countries and three language groups and together have over 120 years of experience of working in permafrost areas throughout the world The book contains over 300 illustrations and photographs and includes an extensive bibliography in order to introduce the interested reader to the large current literature Finalist of the 2019 PROSE Awards **British**

Columbia's Borders in Globalization Nicole Bates-Eamer, Helga Kristín Hallgrímsdóttir, 2021-11-24 This book is a case study collection examining the influences and functions of British Columbia's BC borders in the 21st century British Columbia's Borders in Globalization examines bordering processes and the causes and effects of borders in the Cascadian region from the perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies **Mobile**
