Classes, Estates and Order in Early-Modern Brittany James B. Collins, 1994 The classes and their interests are analyzed first in an examination of the Breton economy and then the social system and the political superstructure that preserved it Finally Professor Collins addresses the question of order itself How did the elites preserve order What order did they wish to preserve His analysis suggests that early modern France was a much more unstable mobile society than previously thought that absolutism existed more in theory than in practice and that local elites and the Crown compromised in mutually beneficial ways to maintain their combined control over society They imposed a new order one neither feudal nor absolutist on a society reexamining the meaning of basic structures such as the relationship of the family and the individual the role of women in society and property
