The Invisible Hand in Popular Culture Paul Arthur Cantor, 2012-11-05 Popular culture often champions freedom as the fundamentally American way of life and celebrates the virtues of independence and self reliance But film and television have also explored the tension between freedom and other core values such as order and political stability What may look like healthy productive and creative freedom from one point of view may look like chaos anarchy and a source of destructive conflict from another Film and television continually pose the question Can Americans deal with their problems on their own or must they rely on political elites to manage their lives In this groundbreaking work Paul A Cantor explores the ways in which television shows such as Star Trek The X Files South Park and Deadwood and films such as The Aviator and Mars Attacks have portrayed both top down and bottom up models of order Drawing on the works of John Locke Adam Smith Alexis de Tocqueville and other proponents of freedom Cantor contrasts the classical liberal vision of America particularly its emphasis on the virtues of spontaneous order with the Marxist understanding of the culture industry and the Hobbesian model of absolute state control The Invisible Hand in Popular Culture concludes with a discussion of the impact of 9 11 on film and television and the new anxieties emerging in contemporary alien invasion narratives the fear of a global technocracy that seeks to destroy the nuclear family religious faith local government and other traditional bulwarks against the absolute state

Torture As Public Policy James P. Pfiffner, 2015-11-17 After September 11 2001 the Bush Administration decided that the most important intelligence about terrorism would come from the interrogation of captives suspected of terrorism As a result many detainees were subject to harsh interrogation techniques that at times amounted to torture Here James P Pfiffner authoritatively examines the policy directives operational decisions and leadership actions of the Bush Administration that reversed centuries of US policy on the treatment of enemy prisoners He shows how the serious reservations of career military lawyers about these policies were overcome by the political appointees of the Bush Administration Pfiffner then analyses the philosophical and legal underpinnings of the policies and practices that have led to the denunciation of the United States policies by its allies and adversaries throughout the world Looking ahead Pfiffner anticipates Obama administration policy changes to restore U S credibility and accountability In all Torture as Public Policy is a model of detailed policy analysis that demonstrates how greatly public policy matters beyond the back corridors of bureaucracy

Making Human Rights a Reality Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights. In many countries though there is little relationship between international law and the actual protection of human rights on the ground. *Making Human Rights a Reality* takes a fresh look at why it's been so hard for international law to have much impact in parts of the world where human rights are most at risk. Emilie Hafner-Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection. These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest. Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions. To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities. Hafner-Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population. *Crime, Media, and Reality*

Venessa Garcia, Samantha G. Arkerson, 2017-12-08 In today's society the public perception of crime has been skewed by how the media depicts it. People use the media for enjoyment, companionship, surveillance, and interpretation. The problem is that it becomes hard to separate fact from entertainment. This raises several questions: How are we consuming media? Are we consuming reality within the news? And are we consuming harmless pleasure from entertainment media? In *Crime, Media, and Reality: Examining Mixed Messages about Crime and Justice in Popular Media*, Venessa Garcia and Samantha Garcia Arkerson focus predominantly on the social constructions of crime and justice and how we absorb them. They look at the influence of crime news and true crime television series that prevent the public from understanding pure entertainment from the realities of crime and justice. They bring to light the social science knowledge missed by media infotainment which has blurred the line between information and entertainment. Throughout all different forms of media are discussed: news, media crime dramas, and true crime television series. In doing so they keep all of its fascinating coverage while uncovering the reality of crime and justice. This book adds significant information to the constructs held by the general public by placing media depictions into historical, legal, and social context. *Revenge and Social Conflict*

Kit R. Christensen, 2016-09-15 An in-depth philosophical study of the nature and immorality of revenge. **Theatres of Human Sacrifice**

Mark Pizzato, 2004-11-18 Contemporary debates about mass media violence tend to ignore the long history of staged violence in the theatres and rituals of many cultures. In *Theatres of Human Sacrifice*, Mark Pizzato relates the appeal and possible effects of screen violence today in sports, movies, and television news to specific sacrificial rites and performance conventions in ancient Greek, Aztec, and Roman culture. Using the psychoanalytic theories of Lacan, Kristeva, and Žižek as well as the theatrical theories of Artaud and

Brecht the book offers insights into the ritual lures and effects of current mass media spectatorship especially regarding the pleasures purposes and risks of violent display Updating Aristotle s notion of catharsis Pizzato identifies a sacrificial imperative within the human mind structured by various patriarchal cultures and manifested in distinctive rites and dramas with both positive and negative potential effects on their audiences
