

We are learning to: Simplify algebraic fractions using cancellation.

Sometimes it's helpful to **factorise before simplifying** an algebraic fraction.

Ex7 Simplify,

$$\frac{x+5}{2x+10}$$

Solution

$$\frac{x+5}{2x+10} = \frac{1\cancel{x+5}}{2(\cancel{x+5})}$$

Factorise the denominator.

$$= \frac{1}{2}$$

Replace with "1" when 'fully' cancelled.

Ex8 Simplify,

$$\frac{2x+10}{x+5}$$

Solution

$$\frac{2x+10}{x+5} = \frac{2(\cancel{x+5})}{\cancel{x+5}}$$

Factorise the denominator.

$$= 2$$

Q3 Simplify,

Solution

$$[a] \frac{3x+15}{x+5} = \frac{3(\cancel{x+5})}{\cancel{x+5}}$$

$$= 3$$

$$[b] \frac{x+5}{3x+15} = \frac{1\cancel{x+5}}{3(\cancel{x+5})}$$

$$= \frac{1}{3}$$

- Developing learners will be able simplify algebraic fractions involving linear terms.
- Secure learners will be able to simplify algebraic fractions involving quadratic terms.
- Proficient learners will be able to simplify algebraic fractions expressed in unfamiliar forms.

Fractions: Multiply and Divide Workbook Maria Miller,2016-02-03 We start out in the fifth grade workbook Fractions Multiply and Divide by simplifying fractions Since this process is the opposite of making equivalent fractions it should be relatively simple for students to understand We also use the same visual model as we would for making equivalent fractions just backwards The pie pieces are joined together instead of split apart Next comes multiplying a fraction by a whole number Since this can be solved by repeated addition it is not a difficult concept at all Multiplying a fraction by a fraction is first explained as taking a certain part of a fraction in order to teach the concept After that students are shown the usual shortcut for the multiplication of fractions Simplifying before multiplying is a process that is not absolutely necessary for fifth graders I have included it here because it prepares students for the same process in future algebra studies and because it makes fraction multiplication easier I have also tried to include explanations of why we are allowed to simplify before multiplying These explanations are actually proofs I feel it is a great advantage for students to get used to mathematical reasoning and proof methods well before they start high school geometry Then we find the area of a rectangle with fractional side lengths and show that the area is the same as it would be found by multiplying the side lengths Students multiply fractional side lengths to find areas of rectangles and represent fraction products as rectangular areas Students also multiply mixed numbers and study how multiplication can be seen as resizing or scaling This means for example that the multiplication $2\frac{3}{4} \times 18$ km can be thought of as finding two thirds of 18 km Next we study division of fractions in special cases The first one is seeing fractions as divisions in other words recognizing that $\frac{5}{3}$ is the same as $5 \div 3$ This of course gives us a means of dividing whole numbers and getting fractional answers for example $20 \div \frac{6}{3} = 2 \times \frac{3}{6} = 1$ Then students encounter sharing divisions with fractions For example if two people share equally $\frac{4}{5}$ of a pizza how much will each person get This is represented by the division $\frac{4}{5} \div 2 = \frac{2}{5}$ Another case we study is dividing unit fractions by whole numbers such as $\frac{1}{2} \div 4$ We also divide whole numbers by unit fractions such as $6 \div \frac{1}{3}$ Students will solve these thinking how many times the divisor fits into the dividend The last lesson is an introduction to ratios and is optional Ratios will be studied a lot in 6th and 7th grade especially in connection with proportions We are laying the groundwork for that here *Mastering Essential Math Skills* Richard Fisher,2021-07-19 This is the new Fractions 2nd Edition a completely edited version including a handy glossary and resource center FRACTIONS is the most difficult math topic for many students This book makes it possible to master ALL fraction operations the fun and easy way Many students were never taught fractions in a manner that is easy to understand This book

will have you loving to work with fractions Perfect for students who have struggled in the past and have found math to be hard Lessons are presented in language that everyone can understand Each lesson flows smoothly and logically to the next Lessons are short concise and to the point Lots of examples with step by step solutions Valuable Helpful Hints are included in each lesson Review is built into each lesson Students will retain what they have learned Each lesson includes Problem Solving This will ensure that students can apply their math knowledge to real life situations Includes free access to video tutorials Just go to www.mathessentials.net and click on the Videos button Includes a solutions section for all problems
