Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week of aerobic and resistance training. The CON group did not exercise. The EX group showed a significant decrease in HR and an increase in EE compared to the CON group. The results suggest that a 12-week training program can improve cardiovascular fitness and increase energy expenditure in sedentary, middle-aged women.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or natural light sources. To avoid this, there are two things the producer should be aware of: the time of the event.
- For most events, the time will comply with the set of rules that state the requirements, the length of the event may vary depending on the set and event requirements.
- The set and event requirements may vary, but they should be the same for all events. The producer should be aware of the event's requirements and should be able to provide the event's requirements.
- The event's requirements should be the same for all events. The event's requirements should be the same for all events.
