International Conference,2000 As the 21st century begins we are faced with opportunities and challenges of available technology as well as pressured to create strategic and tactical plans for future technology Worldwide IT professionals are sharing and trading concepts and ideas for effective IT management and this co operation is what leads to solid IT management practices This volume is a collection of papers that present IT management perspectives from professionals around the world The papers seek to offer new ideas refine old ones and pose interesting scenarios to help the reader develop company sensitive management strategies Web-Age Information Management Bin Cui,Nan Zhang,Jianliang Xu,Xiang Lian,Dexi Liu,2016-05-27 This two volume set LNCS 9658 and 9659 constitutes the thoroughly

refereed proceedings of the 17th International Conference on Web Age Information Management WAIM 2016 held in Nanchang China in June 2016 The 80 full research papers presented together with 8 demonstrations were carefully reviewed and selected from 266 submissions The focus of the conference is on following topics data mining spatial and temporal databases recommender systems graph data management information retrieval privacy and trust query processing and optimization social media big data analytics and distributed and cloud computing

Understanding Search Engines Dirk Lewandowski, 2023-03-07 This book provides a broad introduction to search engines by integrating five different perspectives on Web search and search engines that are usually dealt with separately the technical perspective the user perspective the internet based research perspective the economic perspective and the societal perspective After a general introduction to the topic two foundational chapters present how search tools can cover the Web's content and how search engines achieve this by crawling and processing the found documents The next chapter on user behavior covers how people phrase their search queries and interact with search engines This knowledge builds the foundation for describing how results are ranked and presented The following three chapters then deal with the economic side of search engines i.e. Google and the search engine market search engine optimization SEO and the intermingling of organic and sponsored search results Next the chapter on search skills presents techniques for improving searches through advanced search interfaces and commands Following that the Deep Web and how its content can be accessed is explained The two subsequent chapters cover ways to improve the quality of search results while the next chapter describes how to access the Deep Web Last but not least the following chapter deals with the societal role of search engines before the final chapter concludes the book with an outlook on the future of Web search With this book students and professionals in disciplines like computer science online marketing or library and information science will learn how search engines work what their main shortcomings are at present and what prospects there are for their further development The different views presented will help them to understand not only the basic technologies but also the implications the current implementations have concerning economic exploitation and societal impact

Database Systems for Advanced Applications Hiroyuki Kitagawa, Yoshiharu Ishikawa, Wenjie Li, Chiemi Watanabe, 2010-03-18 This two volume set LNCS 5981 and LNCS 5982 constitutes the refereed proceedings of the 15th International Conference on Database Systems for Advanced Applications DASFAA 2010 held in Tsukuba Japan in April 2010 The 39 revised full papers and 16 revised short papers presented together with 3 invited keynote papers 22 demonstration papers 6 industrial papers and 2 keynote talks were carefully reviewed and selected from 285 submissions The papers of the first volume are organized in topical sections on P2P based technologies data mining technologies XML search and matching graphs spatial databases XML technologies time series and streams advanced data mining query processing Web sensor networks and communications information management as well as communities and Web graphs The second volume contains contributions related to trajectories and moving objects skyline queries privacy and security data streams similarity search and event processing storage and advanced topics industrial demo papers and tutorials and panels

MATLAB-based Finite Element Programming in Electromagnetic Modeling Özlem Özgün, Mustafa Kuzuoğlu, 2018-09-03 This book is a self contained programming oriented and learner centered book on finite element method FEM with special emphasis given to developing MATLAB programs for numerical modeling of electromagnetic boundary value problems It provides a deep understanding and intuition of FEM programming by means of step by step MATLAB programs with detailed descriptions and eventually enabling the readers to modify adapt and apply the provided programs and formulations to develop FEM codes for similar problems through various exercises It starts with simple one dimensional static and time harmonic problems and extends the developed theory to more complex two or three dimensional problems It supplies sufficient theoretical background on the topic and it thoroughly covers all phases pre processing main body and post processing in FEM FEM formulations are obtained for boundary value problems governed by a partial differential equation that is expressed in terms of a generic unknown function and then these formulations are specialized to various electromagnetic applications together with a post processing phase Since the method is mostly described in a general context readers from other disciplines can also use this book and easily adapt the provided codes to their engineering problems After forming a solid background on the fundamentals of FEM by means of canonical problems readers are guided to more advanced applications of FEM in electromagnetics through a survey chapter at the end of the book Offers a self contained and easy to understand introduction to the theory and programming of finite element method Covers various applications in the field of static and time harmonic electromagnetics Includes one two and three dimensional finite element codes in MATLAB Enables readers to develop finite element programming skills through various MATLAB codes and exercises Promotes self directed learning skills and provides an effective instruction tool

Design, Performance, and Analysis of Innovative Information Retrieval Lu, Zhongyu (Joan), 2012-08-31 Daily procedures such as scientific experiments and business processes have the potential to create a huge

amount of data every day hour or even second and this may lead to a major problem for the future of efficient data search and retrieval as well as secure data storage for the world's scientists engineers doctors librarians and business managers

Design Performance and Analysis of Innovative Information Retrieval examines a number of emerging technologies that significantly contribute to modern Information Retrieval IR as well as fundamental IR theories and concepts that have been adopted into new tools or systems This reference is essential to researchers educators professionals and students interested in the future of IR

Understanding Adult Functional Literacy Sheida

White, 2010-10-18 This is a genuinely scholarly work It is based on analysis of the most up to date quantitative surveys that we have on adult literacy These surveys are the gold standard in terms of documenting adult literacy in the United States The author analyzes these extensive surveys and puts them into a theoretical context in a way that has not been done before

Rosemary J Park University of Minnesota I don't know of any book providing the same information There is a shortage of literature in this area and the book is an excellent contribution

Dolores Perin Teachers College Columbia University The contribution of the theory is important not only to adult literacy but to our understanding of the reading process at nearly every level Additionally the application of multidimensional item response modeling to the new TTR theory offers a tantalizing view of how the predictive validity of a theory might be tested and used to provide practical results

Larry Mikulecky Indiana University Very often individual differences in literacy performance are understood exclusively in terms of the characteristics of the reader Drawing on a rich array of empirical research the author presents a detailed and highly integrative new theory of functional literacy The text task respondent TTR theory of functional literacy offers improved understanding of how successful performance on everyday literacy tasks involves a dynamic relationship among the text the task and the reader This book will appeal primarily to assessment developers who wish to select tasks and texts of varying difficulty to yield more precise estimates of adult literacy to researchers who study cognitive linguistic and discourse processes and to teachers who want to find new ways to increase text comprehension among students including English language learners and struggling readers The text is appropriate for an advanced course in adult education discourse analysis educational measurement educational psychology literacy or linguistics or as a reference work for those interested in literacy

Arsenic Contamination of Groundwater Satinder Ahuja, 2008-10-03 Provides a viable reference describing the state of knowledge on sources of arsenic contamination in ground water which affects about 100 million people worldwide With contributions from world renowned experts in the field this book explores developments in the transport kinetics detection measurement seasonal cycling accumulation geochemistry removal and toxicology of arsenic Includes compelling case studies describing how arsenic contamination occurs and the devastating effects on the people and environment affected by it
